

Informazioni chiave per l'investitore

Il presente documento contiene le informazioni chiave di cui tutti gli investitori devono disporre in relazione a questo fondo. Non si tratta di un documento promozionale. Le informazioni contenute nel presente documento, richieste dalla normativa, hanno lo scopo di aiutarLa a capire la natura di questo fondo e i rischi ad esso connessi. Si raccomanda di prenderne visione, in modo da operare una scelta informata in merito all'opportunità di investire.

Amundi Patrimoine

Classe M - Codice ISIN: (C) FR0011660851

OICVM di diritto francese gestito da Amundi Asset Management, società di Amundi

Obiettivi e politica di investimento

Classificazione AMF ("Autorité des Marchés Financiers"): Non applicabile

Sottoscrivendo Amundi Patrimoine - M, accedete a competenze varie in un ampio universo costituito dai mercati internazionali obbligazionari, monetari, azionari e valutari.

L'obiettivo di gestione del Fondo è offrire una performance annuale del 5%, superiore all'indice di riferimento EONIA capitalizzato, indice rappresentativo del tasso monetario della zona Euro, tramite una gestione discrezionale e con un'esposizione flessibile ai vari mercati internazionali azionari, di tasso e dei cambi, previa contabilizzazione delle spese correnti.

Tenuto conto dell'obiettivo di gestione, la performance dell'OIC non può essere confrontata con quella di un indicatore di riferimento pertinente.

Per conseguirlo, il team di gestione, a partire dalla propria analisi macroeconomica e dal monitoraggio della valorizzazione delle classi di attivi, attua una gestione flessibile e di convinzione al fine di ottimizzare in qualsiasi momento il rapporto rischio/rendimento. L'allocation delle attività è costruita in funzione delle previsioni del team sui vari mercati e del livello di rischio presentato da ogni classe di attività. La gestione diversificata e reattiva consente di adeguarsi ai movimenti dei mercati con l'obiettivo di conseguire una performance sostenibile. Questa allocation è implementata attraverso una selezione diretta e attiva di OIC e/o di titoli, ricorrendo a tutti gli stili di prodotti azionari, obbligazionari, di prodotti monetari e di valute. Le obbligazioni saranno selezionate in base al giudizio di gestione e nel rispetto della politica interna di controllo del rischio di credito della Società di gestione. La gestione potrà ricorrere, in modo non esclusivo e non meccanico, a titoli di qualsiasi rating. L'esposizione globale del fondo ai mercati azionari, di tasso e di valute oscillerà per ciascuno di questi mercati all'interno di un range compreso tra lo 0 e il 100% delle attività nette. La sensibilità del comparto obbligazionario e monetario sarà compresa tra -2 e +10. Il fondo può intervenire su tutte le aree geografiche ed investire in supporti rappresentativi di qualsiasi tipo di capitalizzazione. Il fondo è esposto al rischio di cambio.

Il Fondo potrà concludere operazioni di acquisizioni e cessioni temporanee di titoli. Possono inoltre essere utilizzati strumenti finanziari a termine quale copertura e/o esposizione e/o arbitraggio, e/o allo scopo di generare una sovraesposizione e portare di conseguenza l'esposizione del fondo al di là delle attività nette.

Il risultato netto e le plusvalenze nette realizzate dal fondo sono sistematicamente reinvestiti.

Potrà richiedere il rimborso delle Sue quote ogni giorno: le operazioni di rimborso avvengono con frequenza giornaliera.

Raccomandazione: questo fondo potrebbe non convenire agli investitori che prevedono di ritirare il proprio conferimento prima di 5 anni.

Profilo di rischio e di rendimento

Il livello di rischio di questo FCI riflette le scelte di posizionamento del gestore sui mercati azionari e di tasso nell'ambito del margine di manovra preliminarmente definito.

I dati storici utilizzati per il calcolo dell'indice di rischio numerico non possono costituire un'indicazione affidabile del profilo di rischio futuro dell'OICVM.

La categoria di rischio associata a questo fondo non è garantita e potrà evolversi nel tempo.

La categoria più bassa non significa "senza rischio".

Il capitale inizialmente investito non beneficia di alcuna garanzia.

I rischi importanti per l'OICVM non presi in considerazione nell'indicatore sono:

- Rischio di credito: rappresenta il rischio di improvviso peggioramento dell'affidabilità di un emittente o il rischio di suo fallimento.
- Rischio di liquidità: nel caso particolare in cui i volumi di scambio sui mercati finanziari sono molto deboli, qualsiasi operazione di acquisto o vendita su questi ultimi può comportare variazioni importanti del mercato.
- Rischio di controparte: rappresenta il rischio di fallimento di un operatore sul mercato che gli impedisce di onorare gli impegni nei confronti del Suo portafoglio.
- L'utilizzo di prodotti complessi come i prodotti derivati può comportare l'amplificazione dei movimenti dei titoli nel Suo portafoglio.

Il verificarsi di uno di detti rischi può comportare una diminuzione del valore patrimoniale netto del portafoglio.

Spese

Le spese e commissioni versate servono a coprire i costi di gestione dell'OICVM, inclusi i costi di commercializzazione e distribuzione delle quote; tali spese riducono la crescita potenziale degli investimenti.

Spese una tantum prelevate prima o dopo l'investimento

Spesa di sottoscrizione	8,00 %
Spesa di rimborso	Nessuna

Questa è la percentuale massima che può essere prelevata dal Suo capitale prima che quest'ultimo sia investito o sia rimborsato.

Spese prelevate dal FCI in un anno

Spese correnti	0,95 % dell'attivo netto medio
----------------	--------------------------------

Spese prelevate dal FCI a determinate condizioni

Commissioni legate al rendimento	20% annuo della performance superiore a quella dell'indice di riferimento
	Per l'esercizio precedente non è stata prelevata alcuna commissione

Le **spese di sottoscrizione e di rimborso** indicate sono spese massime. In alcuni casi, le spese possono essere inferiori. Per maggiori informazioni può rivolgersi al Suo consulente finanziario.

Le **spese correnti** si basano sulle cifre dell'esercizio precedente, chiuso il 30 giugno 2017. Questa percentuale può variare da un anno all'altro. Esclude:

- le commissioni di overperformance,
- le spese di intermediazione, ad eccezione delle spese di sottoscrizione e di rimborso pagate dall'OICVM quando si acquistano o vendono quote di un altro OICR.

Per maggiori informazioni sulle spese, si prega di fare riferimento alla voce "**Spese e commissioni**" del prospetto di questo OICVM, disponibile su semplice richiesta presso la società di gestione.

Performance passate

Le performance non sono costanti nel tempo e non sono indicative di le performance future.

Le performance annualizzate presentate in questa tabella sono calcolate al netto di tutte le spese prelevate dal fondo

Il Fondo è stato creato il 7 febbraio 2012 e la sua classe M il 27 dicembre 2013.

La valuta di riferimento è l'euro (EUR).

Informazioni pratiche

Nome della Banca depositaria: CACEIS Bank.

Informazioni supplementari relative all'OICVM:

L'ultimo prospetto e gli ultimi documenti periodici, così come tutte le altre informazioni pratiche, sono disponibili gratuitamente presso la società di gestione.

I dati aggiornati della politica di remunerazione della società di gestione sono consultabili sul suo sito Internet o disponibili gratuitamente su richiesta scritta presso la stessa.

Tale politica descrive in particolare le modalità di calcolo delle remunerazioni e i benefici di talune categorie di dipendenti, gli organi responsabili della loro attribuzione nonché la composizione del Comitato Remunerazioni.

Il valore patrimoniale netto è disponibile su semplice richiesta presso la società di gestione, sul sito Internet www.amundi.com, sui siti Internet degli istituti collocatori e pubblicato in numerosi quotidiani nazionali e regionali nonché su periodici.

Regime fiscale:

In base al Suo regime fiscale, le plusvalenze e gli eventuali rendimenti legati alla detenzione dei titoli dell'OICVM possono essere soggetti a tassazione. Raccogliamo pertanto di informarsi in proposito presso la società di collocamento dell'OICVM.

Responsabilità:

Amundi Asset Management può essere ritenuta responsabile esclusivamente sulla base delle dichiarazioni contenute nel presente documento che risultano fuorvianti, inesatte o incoerenti rispetto alle corrispondenti parti del prospetto per l'OICVM.

L'OICVM non è aperto ai residenti degli Stati Uniti d'America/"U.S. Person" (la definizione di "U.S. Person" è disponibile sul sito Internet della società di gestione www.amundi.com e/o nel prospetto informativo).

L'OICR dispone di altre quote o azioni destinate a categorie di investitori definite nel prospetto.

Questo OICVM è autorizzato in Francia e regolamentato dall'Autorité des marchés financiers (AMF).

La società di gestione Amundi Asset Management è autorizzata in Francia e regolamentata dall'Autorité des marchés financiers (AMF).

Le informazioni chiave per l'investitore fornite nel presente documento sono esatte e aggiornate al 1 ottobre 2018.

PROSPECTUS

I – GENERAL FEATURES

- ▶ **Name:** Amundi Patrimoine
- ▶ **Legal form and Member State in which the UCITS has been set up:** French Mutual Fund (FCP)
- ▶ **Launch date, approval date and scheduled term:** UCITS launched on **7 February 2012**, approved on 23 October 2012, for a term of 99 years, conversion from contractual mutual fund to general-purpose fund approved on 23 October 2012.

► Summary of the management offer:

Name Unit	ISIN Code	Allocation of distributable sums	Accounting currency	Minimum initial subscription	Minimum subsequent subscription	Eligible subscribers
C units	FR0011199371	<u>Allocation of net profit:</u> Accumulation <u>Allocation of realised net capital gains:</u> Accumulation	Euro	one thousandth of a unit	one thousandth of a unit	All investors with a long-term investment strategy and seeking exposure to the money-market, bond, equity and international currency markets.

- **Address from which the latest annual or periodic report and financial statements may be obtained:**

The latest annual report and financial statements along with the breakdown of assets will be sent to investors within eight working days upon written request from the holder to:

Amundi Asset Management
90, Boulevard Pasteur – 75015 Paris

Further information may also be obtained from your usual advisor.

The AMF website (amf-france.org) contains further details on the list of regulatory documents and investor protection regulations.

II – SERVICE PROVIDERS

► **Management Company:**

Amundi Asset Management, a simplified joint-stock company (société par actions simplifiée)
Portfolio Management Company operating under AMF approval no. GP 04000036
Registered office: 90, Boulevard Pasteur -75015 Paris

► **Depositary, Custodian and Liability Manager:**

CACEIS BANK, a French public limited company (Société Anonyme)
Registered office: 1-3 Place Valhubert, 75013 Paris, France
Main business: Bank and investment services provider approved by CECEI on 1 April 2005.

With regard to regulatory duties and duties contractually entrusted by the management company, the depositary's main task is taking custody of the UCITS' assets, checking that the decisions of the management company are lawful and monitoring the UCITS' cash flows.

The depositary and the management company belong to the same group therefore, in accordance with the applicable regulations, they have implemented a policy to identify and prevent conflicts of interest. If a conflict of interest cannot be avoided, the management company and the depositary shall take all necessary measures to manage, monitor and report this conflict of interest.

The description of the delegated custodian duties, the list of the depositary's delegates and sub-delegates and information relating to conflicts of interest that may result from these delegations are available on the CACEIS website: www.caceis.com or free of charge on written request.
Updated information is available to unitholders on request.

► **Institution responsible for clearing subscription and redemption orders by delegation of the Management Company:**

CACEIS BANK, a French public limited company (Société Anonyme)
Registered office: 1-3 Place Valhubert, 75013 Paris, France
Main business: Bank and investment services provider approved by CECEI on 1 April 2005.

The depositary is also responsible, by delegation of the management company, for the UCITS' liability accounting, which covers the clearing of subscription and redemption orders for units and managing the unit issue account.

► **Independent Auditor:**

PricewaterhouseCoopers Audit
Represented by Philippe Chevalier
63, rue de Villiers

92200 Neuilly-sur-Seine, France

► **Promoters:**

Amundi Group partner networks

The list of promoters is not exhaustive due mainly to the fact that the UCITS is listed on Euroclear. Accordingly, some promoters may not be appointed by or known to the Management Company.

► **Delegated financial manager of a portion of the Fund's assets:**

CPR Asset Management

Portfolio Management Company operating under AMF approval no. GP01056

Registered office: 90, boulevard Pasteur – 75015 Paris, France

Amundi Private Equity Funds

Portfolio Management Company operating under AMF approval no. GP99015

Registered office: 90, Boulevard Pasteur – 75015 Paris, France

Amundi Ireland Limited

Portfolio Management Company operating under Central Bank of Ireland approval no. C23576

Registered office: 1 George's Quay Plaza, George's Quay, Dublin 2, Ireland

► **Delegated accounting manager:**

CACEIS Fund Administration, Société Anonyme

Registered office: 1-3, Place Valhubert - 75013 Paris

CACEIS Fund Administration is a company of the Crédit Agricole Group specialising in the administrative and accounting management of UCIs on behalf of clients inside and outside the Group. CACEIS Fund Administration has accordingly been appointed by Amundi Asset Management as Delegated Fund Accountant for the valuation and accounting of the UCITS.

III - OPERATING AND MANAGEMENT ARRANGEMENTS

1. General features

► **Features of the units:**

• **Nature of the right attached to the category of units:**

Each unitholder is entitled to joint-ownership of the Fund's assets proportional to the number of units held.

• **Registration or other arrangements for maintaining unitholder records:**

In terms of the Fund's liability accounting, the depositary centralises the subscription and redemption orders and operates the unit issuer's account in collaboration with Euroclear France, the company with which the Fund is listed.

Administered registered shares are entered in the liabilities manager's register.

• **Voting rights:**

no voting rights are attached to the units: decisions are made by the Management Company. Note: investors will be notified of changes to the Fund's operating arrangements either individually, through the press or by any other means in accordance with current regulations.

- **Form of units:**

Registered or bearer

- **Decimalisation:**

C units may be subscribed in thousandths of units, provided that the minimum subscription amounts have been respected. Redemptions are made in thousandths of units.

I - C units may be subscribed in thousandths of units, provided that the minimum subscription amounts have been respected. Redemptions are made in thousandths of units.

M - C units may be subscribed in thousandths of units, provided that the minimum subscription amounts have been respected. Redemptions are made in thousandths of units.

O - C units may be subscribed in thousandths of units, provided that the minimum subscription amounts have been respected. Redemptions are made in thousandths of units.

R-C units may be subscribed in thousandths of units, provided that the minimum subscription amounts have been respected. Redemptions are made in thousandths of units.

RETIREMENT-C units may be subscribed in thousandths of units, provided that the minimum subscription amounts have been respected. Redemptions are made in thousandths of units.

S - C units may be subscribed in thousandths of units, provided that the minimum subscription amounts have been respected. Redemptions are made in thousandths of units.

End date of financial year: last net asset value for June

As from the financial year ended on the last trading day of November 2013, the financial year-end shall be on the last trading day of June.

► **First financial year-end:** last trading day of November 2012.

► **Accounting currency:** Euro

► **Tax regime:**

The UCITS, by its nature, is not subject to taxation. However, unitholders may be taxed on any income distributed by the Fund or when they sell Fund units. The tax treatment applicable to amounts distributed by the Fund or unrealised or realised capital gains or losses will depend on the individual unitholder's tax situation, residence for tax purposes and/or the investment jurisdiction of the Fund.

Investors who have questions about their tax situation should consult a financial advisor or a professional investment consultant. Some income distributed by the UCITS to unitholders residing outside France may be subject to withholding tax in that State.

2. Special terms and conditions

► **ISIN code:**

C units	I-C unit	M - C units	O-C units	R-C units	RETIREMENT-C units	S - C units
FR0011199371	FR0012820744	FR0011660851	FR0011553692	FR0013295896	FR0013295904	FR0011585629

► **Classification:** Not applicable

► **Holding of UCIs:** The UCITS may hold up to 100% of its assets in units or shares of UCIs or investment funds.

► **Investment objective:**

The management objective, over a minimum investment horizon of five years, is to seek to outperform the compounded EONIA by 5% year-on-year, the representative index of the money-market rate in the eurozone, through a discretionary management approach and with the flexibility to expose to the Fund to various international equity, interest-rate and

currency markets, after deduction of ongoing charges.

► **Benchmark index:**

Considering the investment objective, the performance of the UCITS cannot be compared to that of the relevant benchmark index. However, as a guide, the performance of the UCITS may be compared to that of the EONIA compound index.

The EONIA expresses the overnight euro money-market rate. It is calculated by the European System of Central Banks (ESCB) as the average rate for the transactions carried out on the euro money market by a panel of international banks. It changes according to the monetary policy of the European Central Bank.

The EONIA compounded Index includes as a supplement the impact of reinvesting interest using the OIS (Overnight Indexed Swap) method.

► **Investment strategy:**

1. Strategies used

To achieve the performance objective, the management team implements a flexible, conviction-based management approach which is based on its projections. Thus, the management will be able – through UCIs and/or a direct management of the securities – to adjust to the movements of the market in seeking sustainable performance. To achieve this, strategic and tactical positions as well as arbitrages may be set up across all equity, interest rate and currency markets. In addition, management may trade in the volatility levels of equities, stock market indices, interest rates and exchange rates. The Fund may trade in all geographic areas, including in emerging markets, and make investment choices representative of all sizes of capitalisation.

The allocation of risk among these various strategies is managed in a dynamic manner based on the projections of the management team with respect to the changes in the various markets. The conclusions of the team's management committee are used to set up a ranking within the classes of assets based on the risk/reward profile. Based on all these views, the management team allocates the risk budget among the various strategies, which will result in the construction of the portfolio.

The management will be conducted through the selection of UCIs, direct selection of securities and forward or spot financial instruments.

Investment process

Creation of a market scenario based on fundamental analysis. The macroeconomic outlook and Amundi Asset Management's strategy serve as reference in the preparation of the market scenario with a 6 to 12-month horizon.

The management committees meet to analyse the behaviour of the markets, to assess the investment themes and the selected investments in order to decide on any tactical changes that may need to be made in the portfolios.

Strategies employed : To achieve this performance objective, the management team may apply various types of strategy.

Equities strategies : The allocation among the various equities markets (segmentation by geographic area and country) and equities sub-markets (segmentation by management style and capitalisation sizes) will depend on the analysis of the economic situation of each area and the valuation of each market segment.

Considering the flexible nature of the policy of exposure to various markets, managers will be able to develop their own specific themes (real estate, small or medium capitalisations), depending on their projections and the expected absolute return of those themes, and that, in order to take advantage of more encouraging growth prospects for certain segments and/or of attractive valuation levels.

Interest rate strategies: The sensitivity of the bond and money-market portion will range from -2 to +10.

Directional, relative-value and curve strategies: Active management of the portfolio's overall bond risk through the allocation of sensitivity to international bond markets or to curve segments based on the bullish or bearish projections of the management team with respect to interest rate changes.

Strategies for trading in the major segments of the bond and money-market markets, i.e.: credit markets (Investment Grade and High Yield), emerging debt markets (including Local Currencies), inflation-indexed bonds, convertible issues, and any other sufficiently liquid bond class that may emerge in the bond universe.

Currency strategies: Management may apply active currency risk management related either to the currency exposure generated by the selected UCIs (hedging of the currency position related to the UCIs bought) or to the need to take a currency position in order to achieve the investment objective.

Volatility strategies: Long and short volatility positions on stock market indices, equities, interest rates and currency through derivatives.

“Real assets” strategy: for diversification purposes, the Fund may invest, in terms of opportunities that arise, in listed or unlisted securities or similar (equities, bonds, etc.) that are representative of the real economy and/or any business sector, including the following major global trends: technology, environment, demography, globalisation and societal changes.

UCIs selection process

The selection process relies on the quantitative and qualitative analyses of UCIs carried out by a team dedicated to the selection of UCIs. The management team selects funds according to the risk/reward profile, market forecasts and the UCI's constraints and objectives.

Risk control:

The portfolio monitoring tools are used to monitor on a daily basis the managed fund and the underlying funds used for changes in risk indicators and, in particular, the level of global risk for each portfolio, the primary risk factors and the contribution to risk by each fund used.

The management team implements a risk management process that makes it possible to become adapted to market movements through reactive and precautionary strategies.

Thus, the management team will be able, during strong market downturns, to stay away from strategic allocations and focus on money-market type assets.

2. Description of the assets used (excluding derivatives)

The global exposure of the Fund to the equity, interest-rate and currency markets will fluctuate for each of these markets within a range from 0 to 100% of net assets.

Equities:

- The exposure to the equities assets class may range from 0 to 100% of assets and will be done through securities held directly or open-ended UCIs.

It may also be exposed to equities via investments in units/shares of closed-ended UCIs and/or closed-ended special purpose vehicles, equivalent to eligible financial securities.

- The allocation among the various geographic areas will depend on the projections of the management team.

- The allocation among large, medium and small capitalisations is not predefined and shall depend on the projections of the manager without pre-set limits.

The Fund may also expose up to 10% of its net assets to unlisted shares:

- issued by small and mid-cap companies, as well as in medium-sized companies. These companies may be from any business sector and any geographical area.

- via investments in units/shares of closed-ended UCIs and/or closed-ended special purpose vehicles, equivalent to eligible financial securities.

Interest rates:

Portfolio securities will be selected according to the best judgement of the management and in compliance with the internal credit risk monitoring policy of the management company. The management may specifically use securities with the ratings described below. However, management does not – either exclusively or automatically – rely on the ratings issued by rating agencies, but bases its convictions about buying and selling a security on its own credit and market analyses.

The exposure to interest-rate products may range from 0 to 100% of net assets.

The Fund may indifferently expose up to 100% of its net assets, directly or through UCIs, to the following interest-rate products :

- eurozone government bonds and international non-eurozone government bonds. These bonds may have any rating.
- bonds issued by private issuers, denominated in any currency and from any geographic area, including emerging debt markets (including Local Currencies).
- in bonds issued by investment funds and/or special purpose vehicles.

The bonds can be rated AAA to D by Standard& Poor's and/or Aaa to C by Moody's and/or deemed equivalent by the management company. Nevertheless, unrated speculative bonds may be selected.

The Fund may expose up to 10% of its net assets to subordinated bonds or complex subordinated bonds ("Contingent Convertibles");

Contingent Convertibles are unique subordinated securities in that they may be converted into shares by an external triggering event and a specific risk that is difficult to understand. This type of asset presents a particular liquidity risk.

These bonds will be issued by private issuers from all geographic areas and denominated in all currencies. These securities may have any rating.

The Fund may also expose up to 10% of its net assets to unlisted bonds issued by private issuers and/or issued by investment funds and/or special purpose vehicles, denominated in any currency and from any geographic area.

Cash will be managed through money market UCIs, money market instruments (negotiable debt securities, fixed-rate treasury notes (BTF), French government treasury notes (BTAN), Euro Commercial Paper), repurchase agreements or deposits.

Currencies:

Any currency, OECD and non-OECD.

Currency risk management will be within the total commitment of 100% of net assets for currencies other than the euro.

Holding of shares or units of other UCIs or investment funds:

The Fund may hold up to 100% of its assets in shares or units of the following UCIs or investment funds:

- French or foreign UCITS⁽¹⁾
- French or European AIFs or investment funds complying with the criteria defined by the French Monetary and Financial Code⁽²⁾

These UCI and investment funds may invest up to 10% of their assets in UCITS, AIF or investment funds. They may be managed by the Management Company or an affiliated company. The risk profile of these UCIs is compatible with that of the UCITS.

(1) up to 100% of net assets in total (regulatory maximum)

(2) up to 30% of net assets in total (regulatory maximum)

3. Derivatives used

Information about the counterparties of OTC derivative contracts:

Counterparties are selected through the procedure in effect within Amundi and based on the principle of selecting the best market counterparties.

This includes specifically:

- a double validation of the counterparties by the Amundi Intermédiation manager and by Amundi Asset Management's Credit Committee after analysis of their financial and operational profiles (type of activities, governance, reputation, etc.) conducted by a team of credit analysts working independently from the management teams.
- a limited number of financial institutions with which the UCITS trades.

Type of markets:

- regulated,
- organised,
- over-the-counter.

Risks in which the Fund Manager intends to trade:

- equity,
- interest rate,
- currency,
- credit
- other risks: volatility via stock market indices

Types of transactions and description of those that must be limited to the achievement of the investment objective:

- hedging,
- exposure,
- arbitrage,
- other.

- Types of instruments used:

- futures: on interest rates, stock market indices/equities, volatility indices and currency
- options: on equities/stock market indices, UCIs, currency and interest rates.
- swaps: on currency, equities, equity portfolios, interest rates, foreign exchange and stock market indices.
- total return swaps

The UCITS may enter into swap contracts in two combinations from the following types of flows:

- fixed rate
- variable rate (indexed on the Eonia, Euribor, or any other market benchmark)
- performance linked to one or more currencies, equities, stock market indices or listed securities, UCIs or investment funds
- optional linked to one or more currencies, equities, stock market indices or listed securities, UCIs or investment funds

- dividends (net or gross)

- currency futures: forward currency purchase, forward currency sale.
- credit derivatives: Credit Default Swaps, CDS (iTraxx, CDX) indices.

Strategy of using derivatives to achieve the investment objective:

- forward contracts are used (i) for purchases and sales as inexpensive and liquid substitutes for real securities in order to adjust both the overall portfolio exposure to bond or equity markets and the geographical allocation among various countries or regions, (ii) for purchases and sales involving the volatility indices of equity markets, either to protect the portfolio against a rise in market volatility or to expose it to the drop in volatility.
- Currency futures are used to adjust the allocation of currencies in the portfolio (currency risk management) by exposing the portfolio to a currency or by hedging the portfolio's exposure.
- options on equity indices and UCIs are (i) long option positions to protect the portfolio against a rise in market volatility, (ii) positions to adjust the overall exposure of the portfolio to equity markets (sectors, sectors and geographic areas). Any net short option positions are tracked in real time in the front-office management tools.
- options on interest-rate futures are:
 - (i) long and/or short option positions to protect the portfolio from an upward movement in market volatility
 - (ii) spread positions (buy and sell of the same type of option) to expose the portfolio to downward movements of the volatility of the markets or, directionally, to changes in the money markets (Euribor and Eurodollar contracts).
- currency options are used to adjust the allocation of currencies in the portfolio (exchange risk management) by exposing the portfolio to a currency or by hedging the portfolio exposure.
- forward currency purchases and forward currency sales are used to manage or hedge against the portfolio's currency risk.
- interest-rate swaps on equity portfolios or equity indices are used as substitutes for real securities to expose or hedge the portfolio against equity indices when they are financially more attractive than the latter.
- currency swaps are used extensively to manage the portfolio's cash flows.
- The UCITS may enter into credit derivatives (credit default swaps, iTraxx and CDX), either to hedge against credit risk or issuer default risk, or as part of arbitrage strategies: to anticipate the upward or downward changes of these instruments (only the CDS on benchmark entities with a minimum rating of BBB- by Standard & Poor's or equivalent may be part of a downward anticipation) or to exploit disparities between the credit risk market and that of the security for a single issuer or between two issuers.
- The UCITS may enter into total return swaps in order to hedge the portfolio and protect it against the risks listed above.

The assets held by the UCITS and to which the total return swaps relate are retained by the depositary.

For information purposes, total return swaps represent approximately 25% of net assets, up to a maximum of 100% of net assets.

4. Embedded derivatives

Risks in which the manager intends to trade:

- equity,
- interest rate,
- currency,
- credit

Types of transactions and description of all operations that must be limited to the achievement of the investment objective:

- hedging,
- exposure,
- arbitrage,

Types of instrument used:

- Listed convertible bonds
- Unlisted convertible bonds (up to 10% of net assets)
- Listed equity warrants
- Unlisted equity warrants (up to 10% of net assets)

Strategy for using embedded derivatives to achieve the investment objective:

- convertible bonds are used to adjust the overall exposure of the portfolio to the equity and bond markets.
- Equity warrants are used to hedge or expose the portfolio to equities.

5. Deposits

The UCITS can lodge deposits for a maximum 12-month period. The deposits are used for cash management purposes and help the Fund reach its cash management objectives.

6. Cash borrowings

The UCITS may have a debit position up to a maximum 10% of its net assets to accommodate cash inflows and outflows (investments/disinvestments in progress, subscriptions/redemptions).

7. Transactions involving temporary acquisition/disposal of securities

Types of transactions used:

- repo and reverse repo agreements with reference to the French Monetary and Financial Code;
- Lending and borrowing of securities as defined by the French Monetary and Financial Code;
- other.

These transactions relate to eligible shares as defined by the regulations. These assets are held with the Depositary.

Types of transaction and description of all operations that must be limited to the achievement of the investment objective:

- Cash management: Through securities repurchase agreements;
- Optimisation of the UCITS' income and performance;
- Possibly contributing to the overexposure of the UCITS.

The Fund's commitment is limited to 200%.

Summary of proportions used:

<u>Types of transactions</u>	<u>Reverse repurchase agreements</u>	<u>Repurchase agreements</u>	<u>Securities lending</u>	<u>Securities borrowing</u>
<u>Maximum proportion of net assets</u>	70%	70%	90%	20%
<u>Expected proportion of net assets</u>	17.5%	17.5%	22.5%	5%

8. Information relating to collateral (temporary purchases and sales of securities and/or over-the-counter (OTC) derivatives including total return swaps (TRS)):

Type of collateral: :

In the context of temporary acquisitions and sales of securities and OTC derivative transactions, the Fund may receive securities or cash as collateral.

Securities received as collateral must adhere to the criteria defined by the Management Company. They must be:

- liquid,
- transferable at any time,
- diversified in compliance with the eligibility, exposure and diversification rules of the UCITS,
- issued by an issuer that is not an entity of the counterparty or its group.

For bonds, the securities will also be issued by high-quality issuers located in the OECD whose minimum rating may be AAA to BBB- on the Standard & Poor's scale or a rating deemed equivalent by the Management Company. Bonds must have a maximum maturity of 50 years.

The criteria described above are detailed in a Risk Policy available on the Management Company's website at www.amundi.com and may be subject to change, particularly in the event of exceptional market circumstances.

The discounts that may be applied to the collateral received will take into account the credit quality, the price volatility of the securities and the results of the stress tests performed.

Reuse of cash received as collateral:

Cash received as collateral may be reinvested in deposits, government bonds, repurchase agreements or short-term money market UCITS in accordance with the Management Company's Risk Policy.

Reuse of securities received as collateral:

Not authorised: Securities received as collateral may not be sold, reinvested or provided as collateral.

► **Risk profile:**

The risks related to the Fund are:

Risks related to classification:

- Discretionary risk: the discretionary management style applied to the Fund is based on the expected performance of the various equities, interest rate and currency markets. There is a risk that the UCITS might not be invested in the best-performing markets at all times.

- Interest-rate risk: the risk of a decline in the value of fixed-income instruments arising from fluctuations in interest rates. It is measured in terms of sensitivity. In periods when interest rates are rising (positive volatility) or falling (negative volatility), the net asset value may fall significantly.

- Equity risk: the risk of a decline in value of the equities or indices to which the portfolio is exposed.

- Risk related to the capitalisation of companies: the Fund may invest in small and mid-cap stocks. The volume of securities listed for trading is limited. Therefore, downward market movements tend to be more acute and more abrupt than for large-cap stocks.

Emerging markets warning: the securities of these countries offer more limited liquidity than large-cap stocks from developed countries; thus, certain securities from these countries may be difficult or impossible to trade at a given time, in particular owing to the absence of transactions in the market or to regulatory restrictions. As a result, investment in these securities may entail departures from the normal operation of the Fund and may increase the portfolio's risk profile. In addition, the downward movements of the market may be more abrupt and faster than in developed countries.

- Currency risk: The risk that investment currencies lose value against the base currency of the portfolio, the euro.

The specific management-related risks are:

- Risk related to the arbitrage strategies applied: arbitrage is a technique used to take advantage of the price differences among markets and/or sectors and/or securities and/or currencies and/or instruments.

- Credit risk: the risk that the quality of a private and/or public issuer's credit might fall or that such issuers might default. Depending on the direction of the UCITS' transactions, a fall (in the case of a purchase) or a rise (in the case of a sale) in the value of the debt securities to which the Fund is exposed can lead to a fall in the UCITS' net asset value.

Warning related to the use of "speculative high-yield" securities: this UCITS must be considered as in part speculative

and, more particularly, intended for investors who are aware of the risks inherent in investments in securities with a low or non-existent rating.

- Volatility risk of convertible bonds and financial futures: the risk of a fall in the value of convertible bonds and financial futures related to the volatility of their option component.

- Risk related to convertible bonds:

the risk of a fall in the value of convertible bonds related to interest rate variations, underlying equity variations, credit risks and volatility variations. If there is a rise in interest rates, a fall in the implied volatility of convertible bonds, a fall in underlying equities and/or deterioration of the credit of issuers of convertible bonds held by the UCITS, the net asset value may fall.

Other risks:

- Risk of capital loss: investors are warned that their capital invested is not guaranteed and may not be recovered.

- Risk of overexposure: The UCITS may invest in forward financial instruments (derivatives) in order to generate overexposure and to increase the exposure of the UCITS in excess of net assets. Depending on whether the UCITS' transactions are buys or sells, the effect of a drop (if a position is bought) or of a rise of the underlying of the derivative (if a position is sold) may be amplified and lead to a greater fall of the net asset value of the UCITS.

- Liquidity risk: in a given case where trading on the financial markets is depressed, any equity purchase or sale transaction can lead to significant market fluctuations.

- Risk associated with equities and unlisted bonds (incidental):

These securities carry a liquidity risk due to the absence of an active market and the nature of issuers who do not intend to redeem their shares before maturity; these securities also carry a valuation risk given the absence of listings and market references as they cannot be precisely monitored.

The inability to sell these securities at the times and prices initially planned may therefore have a negative impact on the net asset value of the UCI.

- Risk associated with the use of private subordinated bonds (incidental): the risk related to the security's payment characteristics in the event that the issuer defaults: UCIs that are exposed to a subordinated security will not be prioritised and the repayment of capital and the payment of coupons will be considered "subordinate" to those of other creditors who hold higher-ranked bonds; therefore, the security may be repaid in part or not at all. The use of subordinated bonds may result in a greater risk of a reduction in the net asset value than the risk associated with the issuer's other bonds.

- Specific risk associated with the use of complex subordinated bonds (contingent convertibles) (incidental):

This is the risk related to the characteristics of these quasi-perpetual securities: cancellation of the coupon, partial or total reduction in the value of the security, conversion of the bond into a share, repayment of the capital and payment of coupons deemed "subordinate" to those of other creditors holding higher-ranked bonds, with the possibility of lifetime appeal at predetermined levels. All or some of these specific features may be triggered, at any time, either due to the issuer's financial ratios or by a discretionary and arbitrary decision made by the issuer, or with the approval of the competent supervisory authority. The occurrence of one of these risks may lead to a decline in the net asset value of the UCI.

- Counterparty risk: The UCITS uses temporary purchases and sales of securities and/or OTC derivative contracts, including total return swaps. These transactions, entered into with a counterparty, expose the UCITS to a risk of default and/or non-execution of the counterparty's unit return swap, which may have a significant impact on the net asset value of the UCITS. This risk may not necessarily be offset by the financial guarantees received.

- Liquidity risk related to temporary purchases and sales of securities and/or total return swaps: The UCITS may be exposed to trading difficulties or the temporary inability to trade certain securities in which the UCITS invests or in those received as collateral, in the event of a counterparty defaulting on temporary purchases and sales of securities and/or total return swaps.

- **Legal risk:** The use of temporary purchases and sales of securities and/or total return swaps (TRS) may create a legal risk, particularly in relation to swaps.

► **Eligible subscribers and standard investor profile:**

The Fund comprises several classes of units:

- C units: All subscribers with a long-term investment strategy and seeking exposure to the money market, bond, equity and international currency markets.
- O (C) units: Reserved for feeder UCIs managed by the Amundi group.
- S (C) units: Reserved for Employee Savings UCIs managed by the Amundi management companies and for UCIs or mandates dedicated to group retirement savings (specifically Articles 39 and 83 of the French General Tax Code), managed by the Amundi management companies.
- M (C) units: Reserved for Italian management companies and insurance companies and their foreign subsidiaries
- I (C) units: All subscribers, more specifically legal entities and UCIs
- R (C) units: Strictly reserved for investors subscribing directly or via intermediaries providing portfolio or mandate management services and/or financial investment consultancy services not authorising them to retain retrocessions, either contractually or pursuant to the MiFID II regulation or national legislation
- RETRAITE (C) units: Reserved for group retirement savings investments (Article 83 of the French General Tax Code) managed by the Amundi group management companies

The recommended minimum investment period is 5 years. The amount that might be reasonably invested in this UCITS depends on each investor's personal situation. To determine this amount, investors should consider their personal assets, their current financial needs and the recommended investment period as well as their willingness to accept risks or their wish to invest cautiously. It is also recommended that investors sufficiently diversify their investments so as not to be exposed solely to the risks of this Fund.

This Fund's units cannot be offered or sold directly or indirectly in the United States of America (including its territories and possessions) to a U.S. Person as defined in U.S. "Regulation S" adopted by the Securities and Exchange Commission ("SEC").⁽¹⁾

► **Date and frequency of NAV calculation:**

The net asset value is established on each Euronext Paris trading day, with the exception of official French public holidays.

► **Subscription and redemption conditions:**

Subscription and redemption requests are centralised each NAV calculation day (D) at 12.25 or at 16.00 for requests concerning feeder UCIs only. These requests are executed on the basis of the net asset value of D and calculated on the following business day (D+1).

The persons wishing to acquire or subscribe units will be required to certify, at the time of any acquisition or subscription of units of the Fund, that they are not "U.S. Persons". Any unitholder who becomes a U.S. Person must immediately notify the Fund's management company of the change.

► **Establishments authorised to receive subscriptions and redemptions by delegation of the Management**

¹ The term "U.S. Person" means: (a) any individual residing in the United States of America; (b) any entity or company organised or incorporated under the laws of the United States; (c) any estate of which the executor or the administrator is a U.S. Person; (d) any trust of which any trustee is a U.S. Person; (e) any branch or subsidiary of a non-US entity located in the United States of America; (f) any non-discretionary account (other than an estate or trust) held by a financial intermediary or any other fiduciary organised, incorporated, or (if an individual) resident in the United States; (g) any discretionary account (other than an estate or trust) held by a financial intermediary or any other fiduciary organised, incorporated, or (if an individual) resident in the United States; and (h) any entity or company, if it is (i) organised or incorporated under the laws of any non-U.S. jurisdiction and (ii) formed by a U.S. Person principally for the purpose of investing in securities not registered under the U.S. Securities Act of 1933, as amended, unless it is organised or incorporated, and owned, by Accredited Investors (as defined in Rule 501(a) of the Act of 1933, as amended) who are not individuals, estates or trusts.

Company: CACEIS Bank.

Investors should note that orders sent to distributors other than the aforementioned institutions should take into account the fact that the cut-off time for clearing orders applies to those distributors with CACEIS Bank.

As a result, these distributors may apply their own deadline, earlier than the time mentioned above, to allow them to meet their order transmission deadline to CACEIS Bank.

► **Place and methods of publication or communication of the net asset value:**

The NAV of the UCITS is available on request from the Management Company and on its website: www.amundi.com

► **Features of the units:**

• **Minimum amount of the initial subscription:**

C Units: 1 one thousandth of a unit

I-C units: 10 Unit(s)

M - C units: one thousandth of a unit

O-C units one thousandth of a unit

R-C units 1 thousandth of a unit

RETIREMENT-C units 1 Unit(s)

S - C units: one thousandth of a unit

• **Minimum amount of a subsequent subscription:**

C Units: 1 one thousandth of a unit

I - C units: one thousandth of a unit

M - C units: one thousandth of a unit

O-C units one thousandth of a unit

R-C units 1 thousandth of a unit

RETRAITE-C units: 1 thousandth of a unit

S - C units: one thousandth of a unit

• **Decimalisation:**

C units: Units may be subscribed in thousandths of units, provided that the minimum subscription amounts have been respected. Redemptions are made in thousandths of units.

I-C units: Units may be subscribed in thousandths of units, provided that the minimum subscription amounts have been respected. Redemptions are made in thousandths of units.

M - C units: Units may be subscribed in thousandths of units, provided that the minimum subscription amounts have been respected. Redemptions are made in thousandths of units.

O-C units Units may be subscribed in thousandths of units, provided that the minimum subscription amounts have been respected. Redemptions are made in thousandths of units.

R-C units Units may be subscribed in thousandths of units, provided that the minimum subscription amounts have been respected. Redemptions are made in thousandths of units.

RETIREMENT-C units Units may be subscribed in thousandths of units, provided that the minimum subscription amounts have been respected. Redemptions are made in thousandths of units.

S - C units: Units may be subscribed in thousandths of units, provided that the minimum subscription amounts have been respected. Redemptions are made in thousandths of units.

- **Initial Net Asset Value:**

C Units: 100.00 euros
 I - C units: 50,000.00 euros
 M - C units: 100.00 euros
 O-C units 100.00 euros
 R-C units EUR 100.00
 RETIREMENT-C units EUR 100.00
 S - C units: 100.00 euros

- **Currency of the units:**

 O-C units Accumulation
 S - C units: Accumulation
 M - C units: Accumulation
 I-C units: Accumulation
 RETIREMENT-C units Accumulation
 R-C units Accumulation

- ▶ **Costs and fees:**

- **Subscription and redemption fees:**

Subscription and redemption fees increase the subscription price paid by the investor, or reduce the redemption price. Fees are retained by the Fund to offset the costs incurred by the Fund in investing or liquidating the amounts involved. Fees not accruing to the Fund are due to the Management Company, the Promoter, etc.

Fees paid by the investor, charged at subscription and redemption	Basis	Interest rate
Subscription fees not accruing to the Fund	NAV x Number of units	C Units: maximum 2.50%
		I-C units: None
		M - C units: maximum 8.00%
		O-C units maximum 5.00%
		R-C units: Maximum 2.50%
		RETIREMENT-C units Maximum 5.00%
		S - C units: maximum 5.00%
Subscription fees accruing to the Fund	NAV x Number of units	None
Redemption fees not accruing to the Fund	NAV x Number of units	C Units: None
		I-C units: None
		M - C units: None
		O-C units None
		R-C units None
		RETIREMENT-C units None
		S - C units: None
Redemption fees accruing to the Fund	NAV x Number of units	None

Exemption:

- In the event of redemption followed by a subscription on the same day for the same amount and account, based on the same net asset value, no redemption or subscription fee is charged.

- Feeder UCITS managed by Amundi (including those managed by Amundi Luxembourg S.A.), as well as employee savings UCITS managed by the Amundi management companies and mandates dedicated to collective pension savings (specifically Articles 39 and 83 of the French General Tax Code) managed by the Amundi management companies are exempt from subscription fees.

- Administrative and management fees:

These fees cover all expenses billed directly to the UCITS, except for transaction costs. Transaction costs include intermediary costs (brokerage, stock market taxes, etc.) as well as transaction fees, if any, that may be charged particularly by the Depositary and the Management Company.

The following fees may be charged on top of management and administration fees:

- performance fees. These reward the Management Company when the UCITS exceeds its objectives. They are therefore charged to the UCITS;
- transaction fees invoiced to the UCITS;
- fees related to the temporary purchases and sales of securities.

	Fees charged to the Fund	Basis	Rate structure
P1 — P2	Financial management fees <hr/> Administrative fees external to the management company	Net assets	C Units: maximum 2.00% inclusive of tax I-C units: maximum 0.80% inclusive of tax M - C units: maximum 2.00 % inclusive of tax O-C units maximum 0.10% inclusive of tax R-C units: maximum 1.00% incl. tax RETRAITE-C units: maximum 1.00% incl. tax S - C units: maximum 0.60% inclusive of tax
P3	Maximum indirect fees (fees and management fees)	Net assets	1.00 % maximum per annum inclusive of tax
P4	Turnover fees Charged partially or jointly by the depository on all the instruments. ***** Charged depending on the instruments and transactions by the Management Company, the delegated Management Company or by Amundi Intermédiation	Charge on each transaction or operation.	Flat fee of between EUR 0 and 450 inclusive of tax depending on the market. ***** Flat fee of €5 per contract (futures/options) or proportional fee of between 0% and 0.20% depending on financial instrument (securities, currencies, etc.)
P5	Performance fees	Net assets	C Units: 20.00% of the difference between the asset value and the benchmark asset I - C units: 20.00% of the difference between the asset value and the benchmark asset M - C units: 20.00% of the difference between the asset value and the benchmark asset O-C units None R-C units: 20.00% of the difference between the net asset value and the reference assets RETIREMENT-C units 20.00% of the difference between the

net asset value and the reference assets
--

S - C units: None

The following costs may be added to the fees invoiced to the UCITS as listed above:

- Exceptional legal costs associated with the recovery of the UCITS' debts;
- Costs related to fees due to the AMF from the Management Company in connection with its management of the UCITS.

Administrative and management fees are charged directly to the Fund's Income Statement.

- Performance fee:

The performance fee is based on a comparison between the portfolio's net asset value (net of fixed management fees) and the "reference net asset value". These reference assets correspond to the portfolio's assets, as adjusted for subscriptions and/or redemptions at each valuation date, and valued according to the performance of the benchmark index (daily capitalised EONIA plus 5% per year).

The Fund's performance is calculated according to the change in the net asset value.

This comparison is performed over an observation period that may last one, two or three years.

The first observation period will begin on the date a performance fee was introduced for the Fund, i.e. 09 November 2012. Only the first observation period shall exceed 1, 2 or 3 years as it will begin on 09 November 2012 and end at the last net asset value calculation for June of each year.

For M units: for 2013-2014, performance will be calculated as from 27 December 2013 and the variable portion will not be definitively charged until the accounting year-end on 30 June 2015.

For I units: for 2015-2016, the observation period will begin on the date the I unit was launched and the variable portion will not be definitively charged until the accounting year-end on 30 June 2017.

For R and RETRAITE units: for 2017-2018, the observation period will begin on the date the R and RETRAITE units were launched and the variable portion will not be definitively charged until the accounting year-end on 30 June 2019.

At the end of each year,

- If the Fund's net asset value is higher than the reference NAV, then the management company receives the provision (which will amount to 20% of the difference between both assets) and a new observation period will begin. The reference assets to be used for the new observation period are then readjusted to match the Fund's net asset value.
- If the Fund's net asset value is lower than the reference NAV, no provision is recorded and the observation period continues for one year with the same initial reference NAV.
- At the end of the third year, the reference assets shall automatically be readjusted to match the Fund's net asset value (after deduction of a provision, where applicable), and a new 1–3 year observation period shall commence.

In the event that the Fund's net asset value is lower than the reference NAV between two net asset value calculation dates, any provision previously recorded will be readjusted by a provision reversal. Provision reversals are capped at the level of previous allocations. In the event of a redemption, the portion of the provision corresponding to the number of units redeemed accrues to the management company.

Securities lending transactions and repos:

As part of securities lending and repurchase transactions, Amundi Asset Management has entrusted Amundi Intermédiation and/or the delegated financial manager, on behalf of the UCI, with the following tasks:

- selection of counterparties,
- market contracts set-up requests,

- counterparty risk control,
- qualitative and quantitative monitoring of collateralisation (diversification, rating, liquidity controls), of repurchase transactions and securities lending

Income from such transactions is returned to the UCI.

These transactions generate costs that are paid by the UCI.

Amundi Intermédiation and/or the financial manager's billing may not exceed 50% of the income generated by these transactions.

Such transactions carried out by Amundi Intermédiation and/or the delegated financial manager, companies that are part of the same group as the management company, create a potential conflict of interest.

Selection of intermediaries

The Management Company implements an intermediary selection policy, in particular when entering into temporary purchases and sales of securities and certain derivatives, such as total return swaps (TRS).

We have a rigorous selection process for brokers and financial intermediaries. They are selected from among reputable financial intermediaries on the basis of multiple criteria related to the provision of research services (fundamental financial analysis, company information, value added by partners, solid basis for recommendations, etc.) or execution services (access to market information, transaction costs, execution prices, good transaction settlement practices, etc.). We select only financial institutions from OECD countries with a minimum rating of between AAA and BBB- on the Standard & Poor's scale when the transaction is set up, or with a rating deemed equivalent by the Management Company.

In addition, each of the counterparties retained will be analysed using the criteria of the Risk Department, such as financial stability, rating, exposure, type of activity, past performance, etc.

The list of authorised counterparties is reviewed annually. It involves various parties from the front office and support departments of the Amundi Group. The brokers and financial intermediaries selected will be monitored regularly in accordance with the Management Company's Performance Policy.

IV – COMMERCIAL INFORMATION

Circulation of Fund information:

The prospectus, the latest annual report and interim statements are available from the management company:

Amundi Asset Management
90, Boulevard Pasteur – 75015 Paris

The net asset value of the **UCITS** is available on request from the Fund Manager and on the website: www.amundi.com.

Unitholders are informed of any changes affecting the Fund in accordance with the procedures defined by the French Market Regulator (AMF): individual information or by any other method (financial notice, interim report, etc.).

Disclosure of the UCITS' portfolio composition:

The management company may disclose, directly or indirectly, the composition of the UCITS' portfolio to unitholders of the UCITS who qualify as professional investors governed by the ACPR, the AMF or the equivalent European authorities, solely for the purpose of calculating the regulatory requirements related to the Solvency II Directive. If applicable, this information must be disclosed once more than 48 hours has passed since the publication of the net asset value.

Financial notices may be published in the press and/or on the Management Company's website: www.amundi.com in the News-and-documentation/Financial-Notices section.

Respect by the Fund of criteria relating to social, environmental and governance quality objectives (SEG):

The Management Company provides investors with information on how the UCITS's investment policy takes account of the criteria for compliance with ESG objectives. This information can be found on the Management Company's website (www.amundi.com) and in the UCITS's annual report (for periods beginning on or after 1 January 2012).

V – INVESTMENT RULES

The Fund adheres to the investment rules laid down by the French Monetary and Financial Code that are applicable to its category.

In particular, the Fund may invest up to 35% of its assets in eligible financial securities and money-market instruments issued or guaranteed by any government or authorised public or semi-public institution.

VI – GLOBAL RISK

Global risk ratio calculation method:

Absolute VaR at a 20% threshold.

Indicative leverage level: 100%

VII - ASSET VALUATION AND ACCOUNTING RULES

Principle

General accounting conventions are applied in compliance with the following principles:

- continuity of trading,
- consistency of accounting methods from one year to the next,
- independent fiscal years.

The standard method for recognising assets in the accounts is the historic cost method, except for portfolio valuation.

Asset valuation rules

The net asset value of the units is calculated with respect to the following valuation rules:

- Securities traded in a regulated market (French or foreign), are valued at market price. In line with the terms and conditions agreed, the benchmark market price is valued at the latest stock market price.

Differences between the listed price used to recalculate the NAV and the historic cost of the securities that make up the portfolio are recognised in an account entitled “Estimation Differences”.

However:

- Securities for which a price has not been recorded on the valuation date or for which the price has been corrected, are valued at their probable trading value as estimated by the Management Company. The Independent Auditor is informed of these valuations and their justification when conducting audits.
- Negotiable debt securities and similar securities are valued on an actuarial basis, using a benchmark described below, plus a difference representing the intrinsic value of the issuer, where applicable:
 - Negotiable debt securities with a maturity of less than or equal to 1 year: Euribor interbank rate in euros
 - Swapped negotiable debt securities: valued using the OIS (Overnight Indexed Swaps) curve.
 - Negotiable debt securities with a term exceeding three months (money market UCIs): valued using the OIS (Overnight Indexed Swaps) curve
 - Negotiable debt securities with maturity of over 1 year: Rates for French treasury bills (BTAN and OAT) with similar maturity dates for the longest durations.

Negotiable debt instruments with three months or less to run will be valued according to the linear method.

Treasury notes are valued at the market rate, provided daily by the Treasury Securities Specialists.

- UCI shares or units are measured at the last known net asset value.
- Securities not traded in a regulated market are valued by the Management Company at their likely trading value. Their valuation is based on their assets and yield, taking into account the prices used in recent major transactions. Investment fund units or shares are valued at the last known NAV or, if necessary, based on available estimates under the control and the responsibility of the Management Company.
- Monetary investments, deposits and financial instruments held in the portfolio and denominated in foreign currencies are translated into the accounting currency of the UCITS at the exchange rate on the valuation date.
- Securities, which are covered by a temporary disposal or acquisition contract, are valued in accordance with the legislation in force, and the methods for application are determined by the Management Company.

Securities received under repurchase agreements are recorded in the buy portfolio under the heading “Debt representing securities received as part of repurchase agreements” at the amount stated in the contracts, plus any interest receivable. Securities lent under repurchase agreement are posted in long portfolios at their stock market price. Interest receivable and payable for repurchase transactions is calculated pro rata. Liabilities representing securities lent under repurchase agreements are posted in short portfolios at the value set forth in the agreement, plus any accrued interest due. On settlement, the interest received and paid is shown as debt revenues.

Loaned securities are valued at market price. The indemnity collected in relation to these securities is recorded under revenues on debt securities. Accrued interest is included in the stock market value of the securities lent.

- Transactions on firm forward financial agreements or options traded in organised markets (French or foreign) are valued at market value according to procedures specified by the Management Company. Contracts on forward markets are valued at the settlement price.

Valuation of financial collateral:

Collateral is valued daily at market price (mark-to-market method).

The discounts that may be applied to the collateral received will take into account the credit quality, the price volatility of the securities and the results of the stress tests performed.

Margin calls are made daily, unless otherwise stipulated in the framework contract covering these transactions or if the Management Company and the counterparty have agreed to apply a trigger threshold.

- - Futures or options or swap transactions on OTC markets as authorised under the laws and regulations governing UCIs are valued at market value or at an estimated value under arrangements specified by the Management Company. Interest rate and/or currency swap contracts are valued at their market value based on the price calculated by discounting future cash flows (principal and interest), at the market interest rates and/or currency rates. This price is adjusted for issuer risk.

Recognition method

Securities entering and leaving the portfolio are recognised excluding costs.

Revenues are recognised when received.

Revenues consist of:

- income from securities,
- dividends and interest received on foreign securities, at the foreign currency rate,
- cash proceeds in foreign currency, loan income, and revenue from lending of securities and other investments.

The following deductions are made from these revenues:

- management fees,

- financial expenses and charges on the lending and borrowing of securities and other investments.

Off-balance sheet commitments

Futures contracts are entered at their market value as off-balance sheet commitments at the settlement price. Options are converted into their underlying equivalent. OTC interest rate swaps are valued on the basis of the nominal value, plus or minus the corresponding estimation difference.

Income accruals account

Income accrual accounts ensure fair allocation of income among unitholders, regardless of the subscription or redemption date.

VIII – REMUNERATION

The management company has adopted the remuneration policy of the Amundi group, to which it belongs.

The Amundi group has implemented a remuneration policy adapted to its organisation and its activities. This policy is designed to regulate practices regarding the different remunerations of employees authorised to make decisions, exercise control functions or take risks within the group.

This remuneration policy was defined taking account of the economic strategy, objectives, values and interests of the group, management companies belonging to the group, UCITS managed by group companies and their unitholders. The objective of this policy is to not encourage excessive risk-taking, in particular through the non-observance of the risk profile of the managed UCITS.

Furthermore, the management company has implemented suitable measures to prevent conflicts of interest.

The remuneration policy is adopted and supervised by the Board of Directors of Amundi, the parent company of the Amundi group.

The remuneration policy is available on the website www.amundi.com or free of charge upon written request from the management company.

SECTION 1 – ASSETS AND UNITS

Article 1 - Joint-ownership units

The joint ownership rights are expressed as units, each unit corresponding to an identical share of the Fund's assets. Each unitholder is entitled to joint-ownership of the Fund's assets proportional to the number of units held.

The term of the Fund is 99 years starting from its inception date, except in the event of early dissolution or extension as set forth in these Regulations.

Unit categories: The features of the various categories of units and their access conditions are set out in the Fund's Prospectus.

The different unit categories may:

- have different rules for allocating revenue (distribution or accumulation);
- be denominated in different currencies;
- incur different management fees;
- carry different subscription and redemption fees;
- have different nominal values;

- be systematically hedged against risk, either partially or in full, as set out in the Prospectus. Hedging is done through financial instruments that reduce the impact of the hedging transactions for the Fund's other unit categories to a minimum;
- be reserved for one or more distribution networks.

The Management Company may, after having informed the unitholders and the Depositary, consolidate or split the number of units.

Units may be subdivided on the decision of the Management Company's Board of Directors in tenths, hundredths, thousandths, ten-thousandths or one hundred-thousandths called fractions of units. The provisions in the rules governing the issuing and redeeming of units shall also apply to fractions of a unit, whose value will always be proportional to that of the unit they represent. All other provisions regarding units shall automatically apply to fractions of a unit unless provisions state otherwise.

The Management Company's Board of Directors may also decide, at its own discretion, to split the units by issuing new units which shall be allocated to unitholders in exchange for their existing units.

Article 2 - Minimum level of assets

Units may not be redeemed if the Fund's assets fall below €300,000; where net assets remain below that level for thirty days, the Management Company shall take the necessary measures to wind up the relevant UCITS,

or to perform one of the transactions listed in Article 411-16 of the French Market Regulator's (AMF) General Regulations (transfer of the UCITS).

Article 3 – Issuance and redemption of units

Units can be issued at any time at the request of the bearers. They will be issued at their net asset value plus, where applicable, the subscription fee.

Redemptions and subscriptions are performed under the terms and conditions defined in the Prospectus.

Fund units may be listed for trading in compliance with applicable laws and regulations.

Subscriptions must be paid up in full on the day of the net asset value calculation. They may be paid in cash and/or financial instruments. The Management Company has the right to refuse the securities offered, provided it informs the purchaser of its decision within seven days of their remittance. If accepted, contributed securities shall be measured according to the rules set out in Article 4 and the subscription shall take place based on the first net asset valuation following the acceptance of the securities concerned.

Redemptions shall be carried out in cash only, except when the Fund is to be wound up and concerned unitholders have agreed to accept redemption in the form of securities. They shall be settled by the issuing account holder within a maximum period of five days following the unit's valuation.

If the unitholder is a feeder UCI, redemptions may be made wholly or partially in kind when the feeder UCI has made a specific request to be reimbursed in securities. This redemption will occur in proportion to the assets held in the portfolio of the Master UCI. They shall be settled by the issuing account holder within a maximum period of five days following the unit's valuation.

If however, under exceptional circumstances, the reimbursement requires the prior sale of Fund assets, this period may be extended but shall not exceed 30 days.

Except in the event of a succession or a living gift, the disposal or transfer of units between unitholders, or from unitholders to a third party will be considered as a redemption followed by a subscription. If a third party is involved, the amount of the disposal or the transfer must, if applicable, be made up by the beneficiary in order to reach the minimum subscription level required by the Prospectus.

Pursuant to Article L. 214-8-7 of the French Monetary and Financial Code, the redemption of units by the Fund, like the issuance of new units, may be temporarily suspended by the Management Company when exceptional circumstances require it and the interest of the unitholders demands it.

If the net asset value of the Fund is lower than the amount specified by the Regulations, no further units may be redeemed.

Minimum subscription conditions could be set according to the procedures stipulated in the Prospectus.

The Fund may cease to issue units pursuant to the third paragraph of Article L. 214-8-7 of the French Monetary and Financial Code in situations that objectively require the closure of subscriptions, such as when the maximum number of units has been issued, a maximum amount of assets has been reached, or a specific subscription period has expired. These objective situations are set out in the UCITS' prospectus.

Clauses resulting from the U.S. Dodd-Frank Act:

The management company may limit or prevent the direct or indirect holding of Fund units by any person who is a Non-Eligible Person as defined hereinbelow.

A Non-Eligible Person is:

- a U.S. Person as defined in U.S. Regulation S of the Securities and Exchange Commission (“SEC”); or
- any other person (a) who seems to be directly or indirectly in violation of the laws and regulations of any country or any government authority, or (b) who may, according to the Fund’s management company, cause damage to the Fund that it would not have otherwise suffered or incurred.

In relation to this, the Fund’s management company may:

- (i) refuse to issue any unit if it seems that as a result of such issuance, said units would or could be held directly or indirectly by or on behalf of a Non-Eligible Person;
- (ii) at any time request that a person or entity whose name is listed in the unitholders' registry provide it with information, and a statement to that effect, indicating that such person would deem necessary to determine whether the actual beneficiary of the units is a Non-Eligible Person or not; and
- (iii) carry out, within a reasonable timeframe, a mandatory redemption of all the [units/shares] held by a unitholder/shareholder if it seems that the latter is (a) a Non-Eligible Person and, (b) such person is the sole or joint beneficiary of the units. During such timeframe, the actual beneficiary of [the units/shares] may present comments to the competent body.

This may also apply to any person (i) who seems to be directly or indirectly in violation of the laws and regulations of any country or any government authority, or (ii) who may, according to the Fund’s management company, cause damage to the Fund that it would not have otherwise suffered or incurred.

The mandatory redemption will be carried out at the latest known net asset value less, if applicable, any applicable costs, fees and dues, that will remain payable by the Non-Eligible Person.

Article 4 - NAV calculation

The NAV of the units is calculated in accordance with the valuation rules set out in the Prospectus.

Contributions in kind may only consist of the securities, currencies or contracts eligible for the Fund; they are valued in accordance with the same valuation rules as for the calculation of the Fund’s NAV.

SECTION 2 - FUND OPERATIONS

Article 5 – The Management Company

The Management Company manages the Fund in accordance with the strategy defined for the Fund. The Management Company will at all times act in the sole interest of the unitholders and it alone is entitled to exercise the voting rights attached to the Fund units.

Article 5 a - Operating rules

The instruments and deposits eligible to form part of the UCITS' assets are described in the Prospectus, as are the investment rules.

Article 6 – The Depositary

The Depositary performs the duties entrusted thereto in accordance with the laws and regulations in force as

well as those contractually entrusted by the Management Company.

In particular, it checks that the decisions of the Management Company are properly taken. If necessary, the Depositary must take any custodial measures that it considers useful.

It shall notify the French Market Regulator (AMF) of any disputes with the Management Company.

If the Fund is a feeder UCITS, the Depositary has entered into an information exchange agreement with the Depositary of the master UCITS (or has drawn up appropriate specifications, where applicable, when it is also the Depositary of the master UCITS).

Article 7 – The Independent Auditor

The Management Company appoints an Independent Auditor for a term of six financial years, after obtaining the agreement of the French Market Regulator (AMF). It certifies the accuracy and regularity of the accounts. The Independent Auditor may be re-appointed.

The Independent Auditor is required to report as soon as possible to the French Market Regulator (AMF) any fact or decision concerning collective investment organisations of which it became aware in the exercise of its assignment, which:

- 1° Constitute a material breach of the laws or regulations applicable to this organisation and is likely to have a major effect on the financial position, income or assets;
- 2° Adversely affects the conditions or ability to continue operations;
- 3° Triggers the expression of reservations or refusal to certify the accounts.

Asset valuations and the determination of exchange rates used in currency conversions, mergers or demergers shall be audited by the Independent Auditor.

The Independent Auditor shall appraise any contribution in kind under its responsibility. It shall verify the composition of the assets and other items prior to publication.

The Independent Auditor's fees shall be set by mutual agreement between the former and the Management Company in accordance with a work programme specifying the measures deemed necessary.

It shall certify the statements serving as the basis for the distribution of interim dividends.

If the Fund is a feeder UCITS:

- the Independent Auditor has entered into an information exchange agreement with the Independent Auditor of the master UCITS.
- where it is also the Independent Auditor of the master UCITS, it shall prepare an appropriate work programme.

Its fees are included in the management fees.

Article 8 – Management report and accounts

At the end of each financial year, the Management Company shall prepare the summary documents and shall draw up a report on the management of the Fund during the year then ended.

The Management Company shall establish, at least every six months, an inventory of the Fund's assets which will be audited by the Depositary.

The Management Company holds these documents for consultation by the unitholders for a period of four months from the year-end and informs them of their income entitlement: these documents are either sent by

mail at the express request of the unitholders, or made available to them at the Management Company's offices.

SECTION 3 - ALLOCATION OF PROFITS

Article 9: Allocation of distributable sums

The distributable sums consist of:

1° The net profit plus any amounts carried forward and plus/minus the balance of income accruals;

2° The realised capital gains, net of fees, less any realised capital losses, net of fees recorded during the fiscal year, plus any net capital gains of the same nature recorded during prior fiscal years which have not been distributed or accumulated and plus/minus the balance of capital gains accruals.

The sums mentioned under 1° and 2° may be distributed, in whole or in part, independently from one another.

Distributable sums are paid out within a maximum of 5 months following the fiscal year-end.

The Fund's net income is equal to the sum of interest income, arrears, bonuses and awards, dividends, directors' fees, as well as all income arising from the securities that make up the Fund's portfolio, plus the income from amounts available on a temporary basis and minus management fees and interest on loans.

The Management Company determines the allocation of the distributable sums.

For each class of units, as applicable, the Fund may select for each of the sums mentioned under 1 and 2 one of the following options:

- Full accumulation: distributable sums will be fully accumulated, with the exception of those amounts which are subject to compulsory distribution by law;
- Full distribution: distributable amounts are fully distributed, to the nearest rounded figure;
- For the Funds which prefer to maintain the freedom to capitalise and/or distribute and/or carry forward any distributable sums, the Management Company decides each year on the appropriation of distributable amounts mentioned under 1 and 2.

If applicable, the Management Company may decide, during the fiscal year, to pay one or more interim dividends within the limits of the net income of each of the sums mentioned under 1 and 2 recognised as at the date of the decision.

The specific terms of allocation of income are described in the Prospectus.

SECTION 4 - MERGER - DEMERGER - DISSOLUTION - LIQUIDATION

Article 10 - Merger - Demerger

The Management Company may either transfer all or some of the Fund assets into the fund of another UCITS or split the Fund into two or more other mutual funds.

These merger or demerger transactions can only be carried out after the unitholders have been informed. After each transaction, new certificates will be issued stating the number of units held by each unitholder.

Article 11 - Winding up - Extension

If the level of the Fund's assets remains below the level specified in Article 2 above for a period of thirty days, the Management Company shall inform the French Market Regulator (AMF) and shall wind up the Fund, except in the event of a merger with another mutual fund.

The Management Company may wind up the Fund early; it shall notify the unitholders of this decision and no application for subscription or redemption shall be accepted after such an announcement.

The Management Company may also wind up the Fund if it receives an application to redeem all its units, if the Depositary ceases to operate and no other Depositary has been appointed, or on expiry of its term, if it is not extended.

The Management Company shall inform the French market Regulator (AMF) by mail of the winding-up date and procedures chosen. It will then send the Independent Auditors' report to the French Market Regulator (AMF).

The Management Company may decide, with the Depositary's consent, to extend the Fund's term. The decision must be taken at least three months before the Fund's scheduled expiry date, and made known to the unitholders and to the French Market Regulator (AMF).

Article 12 – Liquidation

In the event that the Fund is wound up, the Management Company or the the person nominated to that effect shall act as the liquidator, failing which a liquidator shall be appointed by the court at the request of any interested party. They shall therefore be vested with extensive powers to realise the assets, pay any potential creditors, and distribute the available balance between the unitholders, in the form of either cash or securities. The Independent Auditor and the Depositary shall work until the transactions involved in liquidation are all complete.

SECTION 5 - DISPUTES

Article 13 – Jurisdiction – Address for service

Any disputes relating to the Fund arising during the Fund's life or during its liquidation, whether between unitholders, or between unitholders and the Management Company or the Depositary, shall be brought before the competent courts.

Regulations updated on: 01 October 2018
