47	Statement of Changes in Net Assets attributable to holders of Redeemable Participating Shares 31 January 2016		
48-68	Notes to the Financial Statements		

Investment Policy and Description of Series

Investment Objectives and Policies

Invesco Asian Equity Fund (the "Fund") aims to achieve long-term capital growth by investing in a portfolio of equity or equity related instruments of companies with exposure to Asian countries. At least 70% of the Net Asset Value ("NAV") of the Fund shall be invested in equity and equity related securities issued by (i) companies and other entities with their registered office in an Asian country, (ii) companies and other entities with their registered office outside of Asia but carrying out their business activities predominantly in one or more Asian countries or (iii) holding companies, the interests of which are predominantly invested in companies with their registered office in an Asian country. Up to 30% of the NAV of the Fund may be invested in aggregate in cash and cash equivalents, money market instruments, equity and equity related instruments issued by companies or other entities not meeting the above requirement or debt securities (including convertible debt) of Asian issuers. The Fund will invest in securities listed or traded on Recognised Markets.

Invesco Continental European Equity Fund (the "Fund") aims to achieve capital growth by investing in securities of Continental European companies. At least 70% of the NAV of the Fund (after deducting ancillary liquid assets) shall be invested in equity securities issued by (i) companies having their registered office in a Continental European country, (ii) companies with registered office outside Continental Europe carrying out their business activities principally in Continental Europe, or (iii) holding companies, the interests of which are principally invested in subsidiary companies with a registered office in Continental European countries. Up to 30% of the NAV of the Fund (after deducting ancillary liquid assets) may be invested in debt securities (including convertible debt) issued by the above companies or in equity or debt securities of companies carrying out business in Continental Europe without meeting the above requirements. The Fund will invest in securities listed or traded on Recognised Markets.

Invesco Global Select Equity Fund (the "Fund") aims to achieve capital growth in international securities. The Manager will invest mainly in shares of companies quoted on the world's stock markets, although it may include other investments that the Manager considers appropriate.

Invesco Japanese Equity Core Fund (the "Fund") aims to achieve capital growth in Japan. The Manager will invest mainly in shares of companies organised under the laws of Japan, although it may include shares of companies organised elsewhere which derive revenues from or have substantial interests in Japan as the Manager considers appropriate. The Fund will invest in securities listed or traded on Recognised Markets.

Invesco UK Equity Fund (the "Fund") aims to achieve capital growth by investing in securities of UK companies. The Manager will invest at least 70% of the NAV of the Fund (after deducting ancillary liquid assets) shall be invested in equity securities issued by (i) companies having their registered office in the UK, (ii) companies and other entities located outside the UK carrying out their business activities principally in the UK, or (iii) holding companies, the interests of which are principally invested in subsidiary companies with a registered office in the UK. Up to 30% of the NAV of the Fund (after deducting ancillary liquid assets) may be invested in equity or debt securities issued by companies carrying out business in the UK without meeting the above requirements. The Fund will invest in securities listed or traded on Recognised Markets.

Invesco Global Real Estate Securities Fund (the "Fund") aims to achieve long-term capital growth together with income. The Fund seeks to achieve its objective by investing primarily in a diversified portfolio of global equity (including Real Estate Investment Trusts ("REITs")), preference shares and debt securities, issued by companies and other entities which derive their revenues from activities related to real estate. The Fund's exposure to US REITs will be primarily to US commercial real estate. Debt securities will have an underlying exposure to, or will be secured by, mortgages or similar instruments and will have a credit rating of investment grade or higher as rated by Standard & Poor's (S&P) or equivalent.

Up to 30% of the NAV of the Fund may be invested in equity or debt securities, which do not meet the above requirements, but are issued by companies and other entities which have a substantial exposure to the real estate market or government debt securities with a credit rating of AAA as rated by S&P or equivalent. Less than 30% of the NAV of the Fund may be invested in debt securities and no more than 10% of the NAV of the Fund may be invested in debt securities rated below investment grade. Up to 20% of the NAV of the Fund may be invested in cash, cash equivalents and money market instruments.

			%	Actual %	Actual %
<p>The Invesco Funds Series (the "Series") is an open ended umbrella Fund constituted as an Irish unit trust comprising Invesco Asian Equity Fund, Invesco Continental European Equity Fund, Invesco Global Select Equity Fund, Invesco Japanese Equity Core Fund, Invesco UK Equity Fund and Invesco Global Real Estate Securities Fund (the "Funds"). The Series is authorised by the Central Bank of Ireland (the "Central Bank") as a UCITS under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, (as amended) (the "UCITS Regulations") and the Central Bank (Undertakings for Collective Investment in Transferable Securities) Regulations 2015 (the "Central Bank UCITS Regulations"). The Series is also authorized by the Hong Kong Securities and Futures Commission ("SFC") under the Hong Kong Securities and Futures Ordinance (Cap. 571) and has been recognised by the Financial Services Authority in the United Kingdom under Section 264 of the Financial Services and Markets Act 2000 (the "Act").</p> <p>The Funds also endeavour to comply with regulatory standards of the other jurisdictions where the Funds are authorised for distribution.</p> <p>The Funds issue units to unitholders. As per the Consolidated Prospectus, these units are referred to as "Shares" and the unitholder is referred to as the "Shareholder" throughout these Financial Statements.</p> <p>Each Fund is a fund in the Invesco range of Funds managed by Invesco Global Asset Management DAC, (the "Manager"). Invesco Global Asset Management DAC is an indirect wholly-owned subsidiary of Invesco Ltd.</p> <p>Each Fund is approved by the Central Bank of Ireland. The Funds except Invesco Global Select Equity Fund are approved by the SFC. In giving authorisation for the Fund the SFC does not take responsibility for the financial soundness of a Fund nor for the correctness of any statements made or opinions expressed in this regard.</p> <p>The Funds are not registered under the United States Investment Company Act of 1940 (as amended) and their Shares have not been registered under the United States Securities Act of 1933 (as amended). Accordingly, Shares may not be offered, sold or delivered in the United States or to US Persons as defined in the current Prospectus of the Funds.</p> <p>The contents of this report, for which the Directors of the Manager are responsible, have been approved by Invesco Global Asset Management DAC, which is regulated by the Central Bank of Ireland.</p> <p>Share prices are available through Invesco's internet site www.invesco.com (for Shareholders in Hong Kong, please refer to www.invesco.com.hk) and if required by local law or regulation, published in local leading financial newspapers including, in the case of Hong Kong, the Hong Kong Economic Times, the South China Morning Post and the Hong Kong Economic Journal. Share prices are currently also available from Reuters and Bloomberg.</p> <p>Any investment in the Funds should be considered long term. There can be no guarantee that the amounts subscribed for in shares will be ultimately realised. Changes in rates of exchange between currencies may cause the value of an investment in the Funds of the Series to diminish or increase. Investors should be aware that investment in emerging markets is by its nature both high risk and potentially volatile.</p> <p>This report to Shareholders does not constitute an offer or invitation to purchase Shares in any of the Funds. Applications for the purchase of Shares may only be made on the basis of the current Prospectus.</p> <p>A new Consolidated Prospectus for Invesco Fund Series and Invesco Fund Series 1, 2, 3,4,5,6 was issued on 29 July 2016. This contains all current and relevant information (as at the date of issue) regarding the Series and other Funds within the Invesco Fund Series 1, 2,3,4,5 and 6. This report to Shareholders has been prepared on the basis of the Prospectus. If you wish to receive a copy of this Prospectus please contact any Invesco office.</p>

*Liquidated on 23 August 2016.

**Effective 10 May 2017 there was a reduction of 10 basis points on the Actual Administration Fee.

Distribution Frequency

^{AA} = Annual

^A = Accumulating

The Manager's fee is based on the daily net asset value of each Fund and is paid monthly. The Manager will also be paid a fee in respect of its duties as Administrator and Registrar for each Fund. The administration fee will be calculated daily and will be paid monthly on the last Business Day of each month at the rates set out in the table above based on the net asset value of each share class of each Fund on each Business Day.

The Manager may pay a portion of its administration fees to the Sub-administrator (BNY Mellon Fund Services (Ireland) Designated Activity Company) which provides certain administration functions to the Funds.

BNY Mellon Trust Company (Ireland) Limited ("The Depository") will be paid a fee calculated on a sliding scale to a maximum rate of 0.0075% per annum of the net asset value of each class of each share of the Funds on the last business day of the month and paid monthly.

The assets of a Fund are exclusively available to satisfy the rights of Shareholders in relation to that Fund and the rights of creditors whose claims have arisen in connection with the creation, operation or liquidation of that Fund.

Investment Adviser's Report on behalf of the Manager

Market and economic review

The Fund's 'A' Shares returned 26.29% compared to the 21.24% return of the benchmark MSCI AC Asia ex Japan Index. This placed the Fund in the first quartile of its peer group, the Morningstar GIFS Asia ex Japan sector, which returned on average 18.93%. The Fund is also first quartile over three and five years.

Fund performance was driven by strong stock selection, with the biggest contributors delivering impressive growth in earnings and free cash flow. NetEase was the biggest contributor as it continues to successfully launch new online games in China. Samsung Electronics also added value as it benefited from rising memory/panel prices, the positive outlook for its OLED business, and increased expectations for improving shareholder returns over the medium-term. Other notable contributors included Chinese auto-parts manufacturer Minth, and Indian agrochemical company UPL, which has benefited from the strength of its globally diversified business model.

Conversely, Korea Electric Power was the biggest detractor as positive factors such as steady tariffs, a rising Korean Won and low fuel costs, which had been tailwinds for the company's earnings, reversed during the period. We believe that the large increase in the international coal price will be unsustainable and expect the government to continue to allow the company to generate an acceptable enough return to encourage investment and sustain its dividend.

We seek to invest in companies whose share prices are substantially below our estimate of fair value. The Fund's exposure to China reflects a preference for areas of the market exposed to the 'new economy' and favourable structural growth trends in domestic consumption, rather than state-owned companies in industrial sectors. We have taken some profits from outperformers such as NetEase, but continue to have a high weighting in selective Chinese internet companies, with the market, in our view, being too sceptical on their ability to maintain strong earnings growth.

Additions to the Fund included: Posco, a Korean steel manufacturer which stands to benefit from supply cuts in China as well as its own ongoing internal restructuring efforts; and SingTel, which has a high and sustainable dividend yield, in our view, as well as decent growth in some of its underlying businesses. We also introduced: China Biologic Products, a private biopharmaceutical company; and Autohome, a Chinese auto website business, which we believe has strong cash flow and attractive growth opportunities.

We continue to favour India despite last year's demonetisation which, in our view, demonstrates the government's determination to reduce inefficiencies. We believe that economic activity in India will continue to grow at a rapid pace, supported by the strength of its domestic drivers, and the government's resolve to keep inflation and the fiscal deficit under control. The increase in our exposure to South Korea over the period reflects in part our belief that the market is underappreciating recent improvements in corporate governance and dividend payouts, with valuations suggesting that there is little priced in for future growth.

Asian economic growth is likely to remain anaemic by its own historical standards, with exports growth not expected to significantly improve given the lacklustre global demand outlook. A shift in US trade policy under Donald Trump is a risk, although we anticipate that the President's protectionist rhetoric will probably be diluted by the necessity for pragmatism. While China's economy is showing signs of stabilisation, this improvement has been accompanied by continued high levels of credit growth, which will need to be addressed eventually.

The current valuation of the Asian equity market in terms of price/earnings is in line with its historic average. Earnings revisions have turned positive but if markets are to sustain their progress earnings growth estimates in the low teens for 2017 may need to materialise, supported by the current cyclical upturn, which could prove a stretch given the uncertain outlook. However, in our view, one of Asia's attractions is that the region's valuation remains at a discount to other equity markets, while it does not seem that the political or economic risks are substantially higher.

Investment Adviser's Report on behalf of the Manager

Market and economic review

The Fund's 'A' Shares returned 13.15% over the 12 months ending 31 January 2017, outperforming the FTSE World Europe ex-UK Index benchmark, which returned 10.48%, and the GIFS Europe ex-UK Large Cap Equity sector which averaged a return of 9.01%, placing the Fund in the first quartile of its peer group. (all performance figures are in EUR, Total Return terms).

European equities have had a volatile 2016, with investor concerns dominated by growth, the banking system, politics, deflation and earnings. Significant outflows from the asset-class over the year added to the valuation opportunity we saw, whilst new economic data surprised to the upside. In addition, the market was very skewed towards what we saw as expensive defensive sectors, away from the cheaper financials and cyclicals. This created opportunities for investors like us who are willing to take a long-term view and overcome the vagaries of market noise.

The oil and gas sector was the largest positive contributor to relative performance. The Fund benefited from good stock picking (e.g. Statoil, Royal Dutch Shell) and an overweight position relative to the benchmark amid a rise in oil prices. The industrials sector was another leading outperformer thanks to good stock selection (e.g. A.P. Moller-Maersk, Deutsche Post). The financials sector also made a notable contribution to relative returns (e.g. ING Group) amid rising growth and inflation expectations, especially in the latter part of 2016.

In portfolio activity terms, we increased the Fund's exposure to the basic materials sector, easing the underweight position relative to the benchmark. A new position was initiated in a German chemicals company, encouraged by a combination of strong balance sheet, recovering product demand and attractive valuations in our view. We also added exposure to the consumer services sector, particularly some food retailers, where we saw good prospects for earnings growth. Meanwhile, exposure to the industrials sector was reduced. We sold out of Braas Monier, a German producer of building materials, taking profits after the company accepted a takeover bid by a US peer. As at period-end, oil and gas stood as the largest overweight and consumer goods the biggest underweight sector relative to the benchmark.

We remain constructive on European equities going into 2017. Europe has proven itself to be remarkably resistant to global macro-economic turbulence last year and a continuation of the modest, but respectable economic recovery that the region is seeing is our base case for 2017. Accommodative monetary policy, a recapitalised banking system, falling unemployment and some wage inflation being witnessed, are all helpful.

We also find Europe to offer an attractive playing field against a global backdrop of higher bond yields and rising inflation, given current valuation levels. On the earnings front, after years of subdued levels, corporate earnings expectations are rising in Europe, helped by favourable financing conditions, operational leverage and increased talks of fiscal stimulus to spur growth globally.

Positioning within the market remains key. While some sectors look expensive to us (e.g. traditional defensive growth areas with bond-like characteristics), other sectors with strong earnings recovery and big dividend potential look much more interesting from a risk/reward perspective. We favour some cyclical exposure (e.g. financials, transportation) to benefit from what we view as a reassuringly robust economic backdrop in Europe, and an environment where markets will continue to move away from the big emphasis on deflationary fears so typical of recent years. We also favour the oil and gas as well as the telecommunications sectors where valuations look very attractive to us.

Many view the busy European electoral timetable in 2017 as a source of concern. Political risks do exist, but we believe that most of that risk is largely priced into valuations. As we go through the electoral season and as the political landscape becomes clearer, the political risk premium on European equities should fade thus offering interesting opportunities for active stock-pickers.

Dated: 3 March 2017 - Invesco Global Asset Management DAC

Investment Adviser's Report on behalf of the Manager

Market and economic review

Although political, economic and central bank policy developments dominated global markets, the MSCI AC World Index managed to deliver strong returns over the review period. After recovering from a difficult start to 2016, resilience of equity markets continued to be tested as market volatility rose ahead of the UK Brexit vote and the hotly contested US elections. Nevertheless, equity markets rallied strongly each time, buoyed by investors' resurging risk appetite and an increasingly optimistic economic outlook. Whilst investors welcomed the sustained assurance from central banks' quantitative easing (QE) measures, these were increasingly seen as reaching their limit as drivers of economic growth and inflation. This was evidenced by Donald Trump's expansionary fiscal policy, deregulatory and reflationary views, which accelerated the rotation away from perceived 'defensive' sectors into more economically sensitive stocks. With inflation expectations rising and an improving outlook for US economic growth, rising bond yields saw the US Federal Reserve implement its much anticipated interest rate hike in December. In contrast, the European Central Bank decided to extend QE until December 2017, prolonging its support to Europe's modest recovery. Year-end saw oil prices receive a boost after major oil producing countries agree to start oil production cuts in January 2017.

Over the 12 months to the end of January 2017, the Fund's 'A' Shares returned 17.62%, compared to the MSCI AC World Index, which returned 17.93% (net total return, US Dollar). During the period, the Fund was placed in the first quartile of its peer group, the GIF OS Global Large-Cap Blend Equity sector, which returned 14.01%.

The Fund's marginal underperformance versus the benchmark MSCI AC World Index was mainly attributed to our holdings in more economically sensitive industrials, telecommunications and select positions in the information technology sectors. Most of the performance drag came from holdings in the UK, in part due to the longer-term impact of the Brexit outcome, and Continental Europe. Particularly, our industrials holdings in UK-based airline companies IAG and easyJet weighed on fund performance. Elsewhere, our information technology positions, especially Finland's Nokia and France's Gap Gemini, adversely impacted relative performance. Amongst so-called 'defensive' sectors, our telecommunications holding BT hurt fund performance as the company continues to face several headwinds. However, a relative lack of exposure to such sectors, including consumer staples, was a positive. Performance support also came from our global energy positions. Share performance of oil companies received a boost from improved market conditions and stronger oil prices after the initial lows at the start of 2016. Strong returns from our materials holdings, especially Canada's Methanex and India's UPL, also helped to offset some of the losses, whilst our financials holdings, especially in the US, also performed well. Financial institutions benefitted from rising bond yields, improving corporate earnings and renewed investors' risk appetite. In aggregate, the Fund's relative returns benefitted from the performance strength of our US holdings, especially in financials, energy and consumer discretionary, which helped to recoup some of the lost performance over the review period.

The Fund is entirely driven by stock selection, seeking the best investment ideas globally. It has a core of what we believe are sustainable growth, cash-generative names, and companies with a strong aftermarket or services element which supports earnings stability. The Fund also has a number of turnaround and special situation investments, which we believe the market is mid-pricing.

Market moves over the past 12 months have been driven by political and economic events and investor uncertainty. This saw investors seeking safety in supposedly 'defensive' sectors, such as consumer staples, during the first half of 2016. However, as bond yields started to rise over the summer and the economic outlook improved, investors began to rotate increasingly out of such 'defensive' sectors, which have performed very well in recent years. With valuations being pushed ever higher, we believe the market is paying too high a price for such low volatility stocks and predictable growth. We remain underweight in such 'defensive' sectors, which we view as expensive, given our strong valuation discipline. Our current positioning reflects where we see long-term value in the more economically sensitive sectors of the equity market, such as energy and financial.

Invesco Japanese Equity Core Fund

Investment Adviser's Report on behalf of the Manager

Market and economic review

The Fund's 'A' Shares returned 7.50% over the 12 months to the end of January 2017, compared to its peer group, the Morningstar Japan Large Cap Equity sector, which returned an average of 7.77%. This placed the Fund in the second quartile of its peer group.

Japan's equity market ended the review period on a positive note, a remarkable turnaround after being hit by a perfect storm early in the year. Uncertainty over global growth, deflation concerns and a strengthening yen pushed down profit expectations and prompted sustained market weakness in the first half. The Bank of Japan (BoJ) also shifted the emphasis of policy away from quantitative easing towards negative interest rates, which, at least initially, had the opposite effect on financial markets of what was intended. The yen strengthened and equities lurched lower as investors took it as a sign that monetary policy was running out of effective options. More recently, the market has been rallying on a combination of better outlook for global growth in 2017, with a weakening yen boosting profit expectations.

Over the period selected holdings in electric power companies underperformed due to lingering concerns over deregulation (lower market share and rates) and potential delays to nuclear plant re-starts. Japan Airlines, amongst other more economically sensitive holdings, was impacted by yen strength and the rebound in oil prices. Nexon also detracted given a combination of its sensitivity to yen appreciation and concerns over delays to mobile game launches, although we believe the game developer remains well positioned to exploit strong intellectual property, particularly in the large Chinese market.

In the early part of the period the Fund had a tilt towards less economically sensitive areas of the market with a domestic bias and significant exposure in the real estate, electric power & gas and retail sectors. The Fund's holdings in Real Estate Investment Trusts (REITs) were one of the biggest contributors to relative performance over the period, thanks to their strong fundamentals and dividend growth potential, amid expectations of gradually improving rents and lower funding costs. The largest contributor was the telecoms company NTT DoCoMo which was buoyed by a strong earnings performance.

Mid-period we started taking profits from relative outperformers, most notably REITs. In turn we started selectively adding exposure to more economically sensitive or cyclical areas, including manufacturers of autos and machine tools as well as financials such as banks and insurers, given that we felt valuations had become attractive in these areas. In recent months, there have been strong contributions from the more cyclical parts of the portfolio, in particular from banks whose share prices rallied from relatively low levels given favourable earnings results and changes in the macro environment after the US presidential election, with a rise in US long-term interest rates seen as beneficial. The weakening yen has also been a strong driver of share prices for Japanese exporters within the portfolio.

The near-term outlook for Japanese equities is supportive, with the recent weakening trend in the yen increasing the likelihood that corporate earnings in the second half of the fiscal year will improve. Meanwhile, loose monetary policy and expansionary fiscal policy are further positives for the market. Corporate governance also continues to improve, with total shareholder returns rising as more companies increase pay-out ratios and undertake share buy backs. Balancing-out this domestic outlook is an uncertain global environment, which suggests volatility in financial markets globally. It will remain important to closely monitor the external environment, given Japan's sensitivity to global economic trends.

For now, we believe that the valuation disparity between stable, cash generative companies and more economically sensitive sectors is excessive, and as such we have a bias to the latter, where we think valuations are compelling even in this tough economic climate. We have significant positions in banks, machinery manufacturers, oil & gas and an airline. However, we still retain positions where we see reasonable valuations and visible earnings, such as electric power & gas and retailers, which stand to benefit from gradual but consistent growth in domestic consumption, as well as positive labour market trends and a more stable currency.

Investment Adviser's Report on behalf of the Manager

Market and economic review

The Fund's 'A' Shares recorded a return of 20.31% over the 12 months to the end of January 2017, compared with the benchmark FTSE All-Share Index, which delivered 20.06%. This placed the Fund in the second quartile of its peer group, the Morningstar GIF Offshore UK Large-Cap Blend Equity sector, which returned an average of 15.0%.

After a volatile start to 2016, the UK stock market rallied strongly over the year. This was driven initially by rising commodity prices and "dovish" (ie looser) central bank monetary policy and then, following the EU Referendum, by the sharp fall in sterling and finally by the surprise election of Donald Trump as US President.

There was significant divergence in sector performance. The resources sectors (oil and mining) performed very strongly through the second half of the period; crude oil continued to rise from its February price lows, particularly on news of a production cut agreement by Organisation of the Petroleum Exporting Countries ("OPEC") members. Share price falls after the Referendum were seen acutely in certain domestically focused sectors while the share prices of companies with US Dollar denominated earnings rose strongly in anticipation of upgrades to forecast earnings.

The Fund's significant exposure to more cyclical sectors of the market benefited performance in the period, particularly during the second half of the year, reversing the trend observed in the early months of 2016 when deflationary fears dominated market sentiment.

Glencore, Rio Tinto and First Quantum performed strongly, in line with recovering commodity prices and weakened sterling. The mid-year fall in the pound also strengthened the overseas earnings of oil majors BP, Royal Dutch Shell and Total, where strong share price performance was supported by the rising oil price, particularly post the OPEC agreement.

Coats Group was also among the top contributors in the period; its share price rose over 40 per cent in December after the thread and zip maker came to an agreement with The Pensions Regulator to pay £255m into its pension schemes, a significant move by the watchdog in an environment of inflated deficits. The cash injection - aimed at securing the group's pension obligations - was viewed by the market as strongly positive for the company's long-term performance prospects.

The Fund Manager took advantage of irrational pricing scenarios following the vote for Brexit, maintaining a long-term investment approach.

Developments since the EU Referendum, notably the surprise election of Donald Trump as the 45th US President and recovering commodity prices drove dramatic sector rotation through the second half of the year. In an environment of rising inflation, growth and bond yields, the market rotated out of "long duration" bond proxies and into "short duration" sectors - notably financials and commodities.

As a result, despite the challenging regulatory outlook for UK banks, the Fund Manager maintains the view that these businesses are well-positioned to benefit from a steepening yield curve and enter the year significantly better capitalised than they were ahead of the 2008 global financial crisis. Elsewhere, the Fund Manager has reduced his exposure to mining companies, managing down the fund's holdings through the rally.

The Fund's largest sector exposure continues to be to integrated oils, in part a reflection of the fund manager's view on the oil price; the Fund Manager expects further tightening in the market in 2017 as demand has surprised on the upside and supply to the downside - regardless of any assumed actions to cut production by OPEC.

		Total proceeds of sales since 1 February 2016	77,774,375

Investment Adviser's Report on behalf of the Manager

Market and economic review

Politics took centre stage in 2016. The UK referendum leaves uncertainty in Europe, while the new US administration brings the prospect of a materially different approach to international relations and economic policy. The initial capital market reaction to these events has been positive for developed market general equity investors and delivered further US Dollar strength. The markets are assuming a more inflationary environment and as such, bond yields around the world tended to move higher in the period as markets speculate on a more rapid pace of monetary policy normalization. Wider global economic data in the period has been generally positive. US data prompted the expected rise in US interest rates in December. Asian data has met expectations, Eurozone and UK data has been better than expected, while Australia surprised with negative third quarter GDP growth. Sectors and property types often used by some investors as bond proxies, including US healthcare and triple net, Australian Real Estate Investment Trust ("REIT") and German residential companies performed poorly in the period. Real estate capital value growth is moderating, albeit investment demand for real estate assets appears to remain high. Trends in tenant demand are still positive, but prospect for further rental growth has moderated in some markets where new supply has risen. REIT earnings growth is being maintained and being passed through into dividend rises, reflecting confidence in earnings sustainability. A large portion of the global REIT universe is currently being priced at a discount to net asset value, despite the sector's good yield and earnings growth visibility in 2017.

During the twelve months to 31 January 2017, the Fund's 'A' Shares delivered a return of 6.85% (US\$, total return). This placed the fund in the second quartile of its peer group, the GIF OS Property - Indirect Global. Absolute performance in the period was positive, driven by the health of underlying real estate fundamentals, demand for real estate yield and wider market risk appetite. The Portfolio under-performed its benchmark in the period, driven by security selection and market allocation. Key detractors to relative performance were security selection in the US, Germany and Hong Kong. Overall, the Portfolio maintains a fundamental quality bias toward companies with higher quality assets, supply constrained real estate markets and generally lower leveraged balance sheets. Additionally, in an environment where risk free rates may continue to rise over the mid-term, our portfolios will focus on investments in companies with above average earnings growth prospects. The Portfolio continues to focus on generating alpha from stock selection. Large over or under weight positions at country or regional levels are not evident in the Portfolio, given the investment environment is still being impacted by economic policy makers and large currency value movements.

Listed real estate companies are generally maintaining financial discipline. They are combining new equity and debt where accretive acquisitions can be made and recycling capital from lower returning assets into any higher returning development opportunities or reducing leverage where investment cycles are maturing. Moderate levels of development activity are being undertaken by appropriately skilled management teams that have exposure to under-supplied real estate markets. Risk will continue to be allocated to specific stock opportunities where there is a belief that attractive relative value exists. Within the broader investment context, the cashflow security, fundamentally driven earnings growth opportunity and tangible asset nature of real estate appears to offer relative attraction to a diversified investor. On this basis, we view listed real estate as offering fair investment return opportunities, by long term standards.

Notes to the Financial Statements

For the year ended 31 January 2017

Significant Accounting Policies

(a) Basis of Preparation

The Financial Statements have been prepared in accordance with accounting standards generally accepted in Ireland ("Irish GAAP") including Financial Reporting Standard applicable in the United Kingdom and Republic of Ireland ("FRS 102") and also in accordance with Irish Statute comprising the European Communities (Undertakings for Collective Investment in Transferable Securities) 2015 (the "UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2015 (the "Central Bank UCITS Regulations"). Irish GAAP, including FRS102, used in preparing financial statements which present a true and fair view are those published by the Institute of Chartered Accountants in Ireland (the "Institute") and issued by the Financial Reporting Council. The Financial Statements have been prepared in accordance with the historical cost convention, as modified by the revaluation of financial assets and financial liabilities held at fair value through profit or loss.

The format and certain wording of the Financial Statements has been adapted from that contained in FRS 102 and Irish Statute, to one which, in the opinion of the Directors of the Manager, more appropriately reflects the Fund's business as an investment fund.

Investments

The Funds classify their investments in transferable securities and money market instruments as financial assets at fair value through profit or loss. For the purpose of determining the redemption value of the redeemable participating Shares in the Portfolios, the investments held by the Portfolios are valued using amortised cost as a best estimate of fair value. Under FRS 102, in accounting for all of its financial instruments, an entity is required to apply either:

(a) the full requirements of Sections 11 "Basic Financial Instruments" and Section 12 "Other Financial Instruments Issues" of FRS 102, or

(b) the recognition and measurement provisions of International Accounting Standards 39 "Financial Instruments: Recognition and Measurement" ("IAS 39") as adopted for use in the European Union and the disclosure requirements of Sections 11 and 12, or

(c) the recognition and measurement provisions of International Financial Reporting Standards 9 "Financial Instruments" and the disclosure requirements of Sections 11 and 12.

The Funds have elected to apply the recognition and measurement provisions of IAS 39 and the disclosure requirements of Sections 11 and 12. In normal market conditions, the difference between the two valuation bases is not significant.

Dividends, interest and capital gains received on investments made by the Funds may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Funds or its Shareholders.

Valuation of Financial Assets

The fair value of financial instruments traded in active markets (such as publicly traded derivatives and trading securities) is based on quoted market prices at the Statement of Financial Position date. The quoted market price used for financial assets held by the Funds is the mid price at 12.00pm (Irish Time) and is most representative of fair value. The value of any investment which is not normally listed, quoted or traded in on a Recognised Market shall be the probable realisation value of the investment estimated with care and good faith by a competent person approved for the purpose by the Depositary, which may be the Directors or their delegate in consultation with the Investment Adviser(s).

The Funds enter into agreements to purchase securities and resell them at a future date. The difference between the purchase cost and sales proceeds is recognised as interest income using the effective interest method over the life of the repurchase agreement.

The preparation of the Financial Statements in conformity with FRS 102 requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Fund's accounting policies. Actual results could differ from those estimates and those differences could be material. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates, if any, are recognised in the year in which the estimate is revised if the revision affects only that year, or in the year of the revision, and future years if the revision affects both current and future years. All references to net assets throughout this document refer to net assets attributable to holders of redeemable participating Shares unless otherwise stated.

The fair value of financial instruments, for Financial Statement purposes, traded in active markets is based on mid prices for long positions and short positions at the Statement of Financial Position date. The quoted market price used for financial assets held by the Funds is the current mid price on the market on which these assets are traded or admitted for trading (being the market which is the sole, or in the opinion of the Directors of the Manager, the principal market on which the investment in question is listed, quoted or dealt in). This is the valuation methodology indicated in the Prospectus where investments or assets listed, quoted or dealt in on a regulated market shall be valued at the valuation point at the mid-price, depending on market convention, on the market where these assets are traded or admitted for trading (being the market which is the sole, or in the opinion of the Directors of the Manager, the principal market on which the investments in question is listed, quoted or dealt in).

(b) Financial assets and liabilities at fair value

The Funds have classified all investments into the fair value through profit or loss category. This has two sub-categories: (1) financial assets and liabilities held for trading and (2) those designated by management at fair value. Financial assets or liabilities held for trading are acquired or incurred principally for the purposes of selling or repurchasing in the short term.

The investments are initially recognised at fair value and transaction costs are expensed as incurred. The investments of the Funds have been valued at the market dealing mid prices at 12.00pm (Irish time) on 31 January 2017.

Investment transactions are accounted for on the trade date up to 12.00pm on 31 January 2017. Applications which are received prior to the dealing cut-off point (12.00pm) will, if accepted, be dealt with on the basis of the net asset value per share of the relevant class calculated at the next valuation point.

Investments are initially recognised at fair value and are derecognised when the rights to receive cash flow from these investments have expired or the Fund has transferred substantially all rights and rewards of ownership. Realised gains/losses on investments disposals are calculated on the Average Cost Method and are recognised in the Income Statement.

If a quoted market price is not available on a recognised stock exchange or from a broker/dealer for non-exchange-traded financial instruments, the fair value is estimated with care and in good faith by a competent person and approved by the Fund Manager, on behalf of the Directors of the Manager. GMS Power Public, Banca Popolare Di Milano Rights 11/02/2017, Anglo Irish Bank Corp, Lake Acquisitions Ltd., Hibu Plc, Scotia Holdings, and BGP Holdings Plc investments were valued in this manner as at 31 January 2017 and as at 31 January 2016.

Notes to the Financial Statements (Continued)

For the year ended 31 January 2017

1. Significant accounting policies (continued)

(c) Foreign currency translation

(i) Functional and presentation currency

Items included in the Funds' Financial Statements are measured using the currency of the primary economic environment in which it operates (the 'functional currency'). This is the US Dollar (USD) for Invesco Asian Equity Fund, Invesco Global Select Fund and Invesco Global Real Estate Securities Fund, Pounds Sterling (GBP) for the Invesco UK Equity Fund, Euro (EUR) for the Invesco Continental European Equity Fund and Japanese Yen (JPY) for Invesco Japanese Equity Core Fund. The USD, GBP, EUR and JPY are also the presentation currencies.

The Financial Statements are presented in the Funds' functional currencies and rounded to the nearest whole number. They are prepared on the fair value basis for financial assets and financial liabilities at fair value through profit or loss and derivative financial instruments. Other financial assets and financial liabilities are stated at amortised cost or redemption amount (redeemable Shares).

(ii) Assets and liabilities in foreign currencies are translated into US Dollars at the rates of exchange ruling at the Statement of Financial Position date. Income and expenditure transactions are translated at the rates of exchange ruling at the date of the transactions.

The principal exchange rates used:

(d) Cash and cash equivalents

Cash and cash equivalents includes cash in hand, deposits held at call with banks and spot contracts. Bank overdrafts are included in liabilities on the Statement of Financial Position. Bank overdraft interest is included as a finance cost in the Statement of Comprehensive Income.

(e) Due from/to brokers

Amounts due from/to brokers represent payables for securities purchased and receivables for securities sold that have been contracted for but not yet delivered or settled as at year end.

(f) Dividend and Interest Income

Dividends are credited to the Income Statement on the dates on which the relevant securities are listed as "ex-dividend". Deposit interest income is accrued on a daily basis using the effective interest rate method. Income is shown gross of any non-recoverable withholding taxes, which are disclosed separately in the Income Statement, and net of any tax credits.

(g) Expenses

The Funds' expenses are recognised on an accruals basis and presented in the Income Statement. Expenses include value added tax where appropriate. Expenses payable at the year end date are presented in the Statement of Financial Position.

(h) Equalisation

An equalisation account is maintained by each Fund so that the amount distributed on all classes of Shares will be the same for all Shares of the same type, notwithstanding different dates of issue. A sum equal to that part of the issue price of a Share which reflects income (if any) accrued up to the date of issue will be deemed to be an equalisation payment. It will be treated as repaid to Shareholders with the first distribution. Equalisation will not be operated in respect of the first issue of Shares by a Fund.

(i) Financial Reporting Standard 1 (Cash Flow Statements)

The Funds have availed of the exemption permitted to open ended investment funds under Section 7 "Statement of Cash Flows" not to prepare a cashflow statement on the basis that substantially all the Funds investments are highly liquid and carried at fair value.

(j) Forward Foreign Exchange contracts

The unrealised gain or loss on open forward foreign exchange contracts is calculated as the difference between the contracted rate and the rate to close out the contract at the Statement of Financial Position date. Realised gains or losses include net gains on contracts which have been settled or offset on other contracts. Net realised gains or losses on forward foreign exchange contracts are a component of net gains/losses on financial assets and financial liabilities at fair value through profit or loss (see note 9 for details).

(k) Distributions payable to holders of redeemable participating Shares and proposed distributions to holders of redeemable participating Shares are classified as finance costs in the Income Statement when they are ratified by the Board of Directors of the Manager.

Notes to the Financial Statements (Continued)

For the year ended 31 January 2017

1. Significant accounting policies (continued)

(l) Redeemable participating Shares

Redeemable participating Shares are redeemable at the Shareholder's option and are classified as financial liabilities. The distributions on these redeemable participating Shares are recognised in the Income Statement as finance costs.

The redeemable participating Shares can be put back to the relevant Fund at any time for cash equal to a proportionate share of the Funds' net asset value. The participating Shares are carried at the redemption amount that is payable at the Statement of Financial Position date if the Shareholder exercised its right to put the Shares back to each Fund.

(m) Value of Investments

To determine the net asset value of each Fund for subscriptions and redemptions, investments have been valued based on the mid market prices at 12:00pm (Irish time) on the relevant trading day. For Financial Statements purposes, investments are valued based at mid prices.

The net asset value per Share is disclosed in the Statement of Financial Position.

(n) Swing Pricing

Securities are valued as outlined in note 1(b). However, in order to mitigate the effects of dilution, the Funds have implemented a policy of "Swing Pricing". In the best interest of Shareholders, the Directors of the Manager may allow for the net asset value to be adjusted, using bid or ask market quotation rather than mid, depending on the net share activity arising from subscriptions, redemptions or switching in a fund for a given business day. The Funds operate partial swing only. That means the Funds will not swing to either a bid or ask price basis daily, but only when a pre determined level of Shareholder activity is exceeded. High redemption level triggers a swing to a bid price basis, whereas high subscription level triggers a swing to ask price basis. The Directors of the Manager have the ability to place a fund on constant swing depending on the recent Shareholder activity trends of a fund.

(o) Withholding tax

The Funds currently incur withholding taxes imposed by certain countries on investment income. Such income is recorded gross of withholding taxes in the Income Statement. Withholding taxes are shown as a separate item in the Income Statement.

(p) Amounts due on creations/liquidations

Amounts due on creations and liquidations represent receivables for creation of shares and payables for liquidation of shares that have been contracted for but not yet delivered by the year end. Creations and liquidations paid after the year end, but based upon year end net asset values, are reflected as amounts due on creations and liquidations in the Statement of Financial Position as at 31 January 2017 and 31 January 2016.

(q) Offsetting

Financial assets and liabilities are offset and the net amount reported in the Statement of Financial Position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. During the years ended 31 January 2017 and 31 January 2016, there were no master netting agreements in place for the Funds.

(r) Capital gains tax on Investment / Withholding Tax on Investment

By investing in India shares and other permitted securities in India including corporate and government bonds, securities investment funds and warrants listed on the India stock exchanges (together "India Securities"), a fund is subject to withholding and other taxes imposed under Indian tax law or regulations. Specifically, a fund's income from interests, dividends and profit distributions sourced from India Securities, received on behalf of the relevant Fund, is generally subject to Indian withholding tax at a rate of 15%, in the absence of an applicable tax treaty. In addition, given the uncertainty surrounding a Fund's potential Indian tax liabilities, in determining the net asset value of the Invesco Asian Equity Fund, a provision is made in the amount of 15% of capital gains for potential Indian capital gains tax.

On 17 November 2014, the China Securities Regulatory Commission (CSRC), Ministry of Finance (MOF), and the State Administration of Taxation (SAT), acting with State Council's approval, jointly announced that foreign investors will be temporarily exempt from tax on capital gains derived from the trading of A-shares under the Shanghai-Hong Kong Stock Connect (Stock Connect) program in relation to disposals made on or after that date. Circular 79 issued on 17 November 2014 also clarified that 10% capital gains tax would be applicable in relation to realised capital gains earned on disposals of China A-shares that had taken place during the five years prior to that date. As a result, there is no provision for potential China capital gains tax for the year ended 31 January 2017 or 31 January 2016.

2. UK Reporting

The offshore Funds (Tax) Regulations 2009 and Subsequent Regulations Amendments ('the Regulations') introduced new provisions to update offshore funds regime and came into effect for periods of accounting commencing after 1 December 2009. The Reporting Funds Regime requires:

1. the reporting fund status is applied for once and in advance.
2. the relevant Share Classes to report details of Income annually, within six months of their accounting year end to both Investors and UK authorities.
3. Investors to provide details of reportable income on their annual tax return.

The following Share Classes currently have UK Reporting status:

<u>Fund</u>	<u>Classes</u>
Invesco Asian Equity Fund	A-AD, C-AD, C-Acc, Z-AD
Invesco Continental European Equity Fund	A-AD, C-AD
Invesco Global Select Equity Fund	A-AD, C-AD, Z-AD
Invesco Japanese Equity Core Fund	A-AD, C-AD, Z-AD (USD), A-Acc GBP Hgd, C-Acc GBP Hgd
Invesco UK Equity Fund	A-AD, C-AD, Z-AD
Invesco Global Real Estate Securities Fund	A-AD, A-AD GBP, C-Acc USD, Z-AD, Z-AD GBP

The Statement of Reportable Income for the financial year end 31 January 2017 will be available through the following Invesco Website by 31 July 2017:

www.invesco.com

Notes to the Financial Statements (Continued)

For the year ended 31 January 2017

3. Soft Commissions and Related Party Transactions

The Funds, (consistent with obtaining the best net result, including best execution), may enter into agreements with counterparties whereby those counterparties may make payments for investment services provided to the Funds.

Investment services are used by the Funds to improve or add to the services provided to its clients. Although each and every service may not be used to service each and every account managed by the Funds, the Directors of Manager considers that those investment services received are, in the aggregate, of significant assistance in fulfilling its investment responsibilities and are of demonstrable benefit to all clients. Only services that in the view of the Directors of the Manager assist in the provision of investment services to the Funds' clients will be paid for by counterparties.

Allowable investment services include services that provide assistance to the Funds in their investment performance. Those services include, but are not necessarily limited to, furnishing analysis, research and advisory services including economic factors and trends, portfolio valuation and analysis, performance measurement, market prices services and the use of specialised computer software and hardware or other information facilities.

The Funds will ensure adherence to the investment decision making responsibilities to their clients in accordance with the laws of the countries that have jurisdiction over their clients or business. This may vary in application with respect to the appropriateness of those investment services provided.

The Funds select counterparties to execute transactions on the basis that transactions will only be executed provided the placing of orders will not operate against the best interest of the Funds' clients and that the multiple is at a level which is generally accepted market practice. The Funds will endeavour to obtain best execution on all transactions for all clients.

In addition, clients may direct the Funds to pay commission to counterparties for products and services that would otherwise have to be paid for. In such cases, the commission is used for the exclusive benefit of the client whose transactions generated that commission.

The Manager, Administrator and Global Distributor (Invesco Global Asset Management DAC) are deemed to be Related Persons under Financial Reporting Standard 102 'Related Party Disclosures'. Fees charged, out of the Fund, by the Manager and Administrator are disclosed in the Income Statement on page 44. Amounts payable at the year end are disclosed in the Statement of Financial Position on page 41. The Manager may pay a portion of its administration fees to BNY Mellon Fund Services (Ireland) Designated Activity Company, the Sub-Administrator, in consideration for the Sub-Administrator providing certain administration functions to the Funds. Fees to the Global Distributor are paid from the Management fee and fees paid to the Registrar are paid from the Administration fee.

Invesco Asian Equity Fund invests in the following Invesco managed fund - the Short Term Investments Company (Global Series) Plc - US Dollar Liquidity Portfolio.

The Manager, Invesco Global Asset Management DAC is a wholly owned subsidiary of Invesco UK Limited, which is a wholly owned subsidiary of Invesco Limited, the group parent company.

Director's fees were not paid from the Funds during the year under review. Directors fees were paid by Invesco Global Asset Management DAC.

There were no Director's holdings in the Funds for the years ended 31 January 2017 and 31 January 2016.

Invesco UK Limited held a beneficial interest in the shares representing approximately the following percentages of the total number Shares in issue of the relevant fund class:

Seed Capital

Invesco UK Limited held the following redeemable participating Shares in the Funds and classes as detailed below:

For the year ended 31 January 2017	Number of Shares at the start of the year	Number of Shares acquired in the year	Number of Shares redeemed in the year	Number of Shares at year end	Percentage of Total Shares %

4. Financial Investments and Associated Risks

Risk Management

In pursuing its investment objectives set out within the section describing the Funds' Investment Policies, each Fund holds a number of financial instruments, these comprise:

- Equity Shares. These are held in accordance with each Funds' investment objectives and policies;
- Cash, liquid resources and short-term debtors and creditors that arise directly from operations; and
- Forwards.

The main risks arising from the Funds' financial instruments are market price (including interest rate, foreign currency and price), liquidity, credit and depositary risks. The Manager reviews policies for managing these risks and they are summarised below.

Global Exposure

Following the assessment of the investment policy of each Fund, the Manager has decided to use Value at Risk (VaR) for the assessment of the global exposure of each Fund.

Value-at-Risk (VaR) is a statistical measurement. It intends to measure the maximum potential loss at a given confidence level (probability) over a specific time period under normal market conditions. All of the positions within the Portfolio are taken into account for the VaR calculation, not just derivatives.

Relative VaR is calculated daily using a VaR risk model based on a two year historical simulation methodology. This method for calculating VaR contains no standard distribution assumption and assumes that history repeats itself.

The Relative VaR of a UCITS cannot be more than 2 times the VaR of the reference portfolio.

The calculation of the Relative VaR is carried out in accordance with the following parameters:

- (a) one-tailed confidence interval of 99%;
- (b) holding period equivalent to 1 month (i.e. 20 business days);
- (c) effective observation period (history) of risk factors of 500 business days (ESMA Guidelines require at least 250 business days); and
- (d) daily calculation.

In line with ESMA Guidelines, as the Funds use the VaR approach to monitor the global exposure, Invesco Global Asset Management DAC calculates the leverage for each Fund on a daily basis, as the sum of the absolute value of the notional of the derivatives used. With respect to financial derivative instruments which do not have a notional value attached to them, the calculation of the value is based upon the market value of the equivalent position of the underlying asset that is attached to the financial derivative instrument and applied consistently and appropriately.

The average level of leverage figures provided below does not take into account any netting and hedging arrangements that the Funds may have in place at any time even though these netting and hedging arrangements are used for risk reduction purpose.

Notes to the Financial Statements (Continued)

For the year ended 31 January 2017

4. Financial Investments and Associated Risks (continued)

Fund Name	Period of Observation	Method Used to Calculate Global Exposure	Global Exposure						Leverage

Invesco Global Real Estate Securities Fund	1 Feb 2016 - 31 Jan 2017	Relative VaR	Historical Simulation	99% confidence level, 20 days, 2 years of risk factors	FTSE EPRA/NAREIT Developed	38.25%	53.16%	45.88%	100%	70%	0.00%	Sum of the notionals of the derivatives

Invesco Global Asset Management DAC monitors that the VaR of the UCITS / 2* VaR of the reference portfolio is not greater than 100%.

The below table also details the Relative VaR approach and the reference portfolio for each Fund. The table also details the minimum, maximum and average daily VaR utilisation that occurred during the one year ending 31 January 2016.

Fund Name	Period of Observation	Method Used to Calculate Global Exposure	Global Exposure						Leverage			
			Method Used to Calculate VAR		Reference Portfolio for Using Relative VAR	VAR Limits Reached for last Financial Year			VAR Limits		Leverage Level Reached During the Financial Year (Average levels as a percentage of NAV, calculated at least twice per month)	Leverage Calculation Method Used
Type of Model	Parameters	Lowest	Highest	Average (based on daily data)		Regulatory Limits	Maximum Limits Defined					
Invesco Asian Equity Fund	1 Feb 2015 - 31 Jan 2016	Relative VaR	Historical Simulation	99% confidence level, 20 days, 2 years of risk factors	MSCI AC Asia ex Japan	42.28%	51.06%	45.37%	100%	70%	0.00%	Sum of the notionals of the derivatives
Invesco Continental European Equity Fund	1 Feb 2015 - 31 Jan 2016	Relative VaR	Historical Simulation	99% confidence level, 20 days, 2 years of risk factors	FTSE Western Europe ex. UK	45.96%	60.70%	51.14%	100%	70%	0.02%	Sum of the notionals of the derivatives
Invesco Global Select Equity Fund	1 Feb 2015 - 31 Jan 2016	Relative VaR	Historical Simulation	99% confidence level, 20 days, 2 years of risk factors	MSCI AC World Index	60.23%	68.96%	63.68%	100%	75%	0.01%	Sum of the notionals of the derivatives
Invesco Japanese Equity Core Fund	1 Feb 2015 - 31 Jan 2016	Relative VaR	Historical Simulation	99% confidence level, 20 days, 2 years of risk factors	Japan TOPIX	41.96%	51.79%	46.98%	100%	80%	0.00%	Sum of the notionals of the derivatives
Invesco UK Equity Fund	1 Feb 2015 - 31 Jan 2016	Relative VaR	Historical Simulation	99% confidence level, 20 days, 2 years of risk factors	FTSE All Share	44.10%	50.78%	47.78%	100%	70%	0.00%	Sum of the notionals of the derivatives
Invesco Global Real Estate Securities Fund	1 Feb 2015 - 31 Jan 2016	Relative VaR	Historical Simulation	99% confidence level, 20 days, 2 years of risk factors	FTSE EPRA/NAREIT Developed	37.52%	51.30%	43.03%	100%	70%	0.00%	Sum of the notionals of the derivatives

Invesco Global Asset Management DAC monitors that the VaR of the UCITS / 2* VaR of the reference portfolio is not greater than 100%.

Notes to the Financial Statements (Continued)

For the year ended 31 January 2017

4. Financial Investments and Associated Risks (continued)

Market Price Risk

Market risk arises mainly from the uncertainty about future prices of financial instruments held. It represents the potential loss the Funds might suffer through holding market positions in the face of price movements.

The Manager meets regularly to consider the asset allocation of the Portfolio in order to minimise the risk associated with particular countries or industry sectors whilst continuing to follow the investment objective. An individual Fund Manager has responsibility for monitoring the existing Portfolio selected in accordance with the overall asset allocation described above and seeks to ensure individual stocks also meet the risk reward profile that is acceptable.

The Manager does not use derivative instruments, with the exception of forwards, to hedge the investment portfolio against market risk, as in their opinion the cost of such a process would result in an unacceptable reduction in the potential for capital growth. As the majority of the Funds' financial instruments are carried at fair value with fair value changes recognised in the Income Statement, all changes in market conditions will directly affect net investment income.

All securities investments present a risk of loss of capital. The Investment Adviser moderates this risk through careful selection of securities and other financial instruments with specified limits. These limits are defined in the Investment Objectives and Policies shown on pages 1 to 3. The Funds' overall market positions are monitored on a daily basis by the Funds' Investment Adviser. The Investment Risk Manager reviews fund performance daily and reports to the Board of Directors of the Manager quarterly.

The Manager reviews VaR of the Funds as a way to manage market price risk.

The Funds' market price risk is managed through diversification of the investment portfolio ratios by exposures. The Portfolio Statements beginning on pages 7, 13, 17, 25, 30 and 36 give a detailed breakdown of the Funds securities grouped either by geographic or industry exposure at mid value.

Interest rate risk

The majority of the Funds' financial assets and liabilities are non interest bearing. As a result, the Funds are not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates. Any excess cash & cash equivalents are invested at short term market interest rates.

Foreign Currency Risk

The Funds hold assets denominated in currencies other than the functional currency. They are therefore exposed to currency risk, as the value of the securities denominated in other currencies will fluctuate due to changes in exchange rates.

The Funds receive income in currencies other than functional currency and the functional currency values of this income can be affected by movements in exchange rates. The Funds convert all receipts of income into functional currency on or near date of receipt.

The Investment Adviser monitors the Funds' foreign currency exposure on a daily basis. The Board of Directors of the Manager review the Funds' foreign exchange exposure on a quarterly basis.

Liquidity Risk

Liquidity risk is the risk that the Fund may not be able to generate sufficient cash resources to settle its obligations in full as they fall due or can only do so on terms that are materially disadvantageous.

The Funds are exposed to daily cash redemptions of redeemable participating Shares. They therefore invest the majority of their assets in investments that are traded in an active market and can be readily disposed of; they invest only a limited proportion of their assets in investments not actively traded on a recognised market.

All Financial Liabilities including redeemable participating Shares fall within one month maturity. The Funds may be overdrawn up to 10% of the NAV on a temporary basis to meet redemption requests. The Funds may also limit total redemption requests to 10% of the NAV in any one day. All redemptions are paid on the fourth business day after the redemption order is accepted. The majority of the Financial Assets held with the Funds are settled on a T+3 basis allowing sufficient time for the Investment Adviser to raise cash to meet redemption liabilities.

In accordance with the Funds' policy, the Investment Adviser monitors the Funds' liquidity position on a daily basis and the Board of Directors of the Manager reviews it on a quarterly basis

The Liquidity Risk exposure of derivative assets and liabilities are represented by the notional value which is disclosed in the Portfolio Statements.

Fair Value Estimation

The Funds have adopted the amendments to FRS 102 - "Fair Value Hierarchy Disclosures", which is effective for accounting periods beginning on or after 1 January 2017.

The fair value of financial assets and liabilities traded in active markets (such as publicly trading securities) are based on quoted market prices at 12:00pm (Irish Time) on 31 January 2017 and 31 January 2016 for Financial Statement purposes.

The quoted market price used for financial assets held by the Funds is the current mid price. The appropriate quoted market price for financial liabilities is the current asking price.

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

Notes to the Financial Statements (Continued)

For the year ended 31 January 2017

4. Financial Investments and Associated Risks (continued)

Fair Value Estimation (continued)

The Funds are exposed to daily cash redemptions of redeemable Shares. They therefore invest the majority of their assets in investments that are traded in an active market and can be readily disposed of; they invest only a limited proportion of their assets in investments not actively traded on a recognised market.

For instruments for which there is no active market, the Funds may use internally developed models, which are usually based on valuation methods and techniques generally recognised as standard within the industry. Valuation models are used primarily to value unlisted equity instruments for which markets were or have been inactive during the financial year. Some of the inputs to these models may not be market observable and are therefore estimated based on assumptions. The output of a model is always an estimate or approximation of a value that cannot be determined with certainty, and valuation techniques employed may not fully reflect all factors relevant to the positions the Funds hold. Valuations are therefore adjusted, where appropriate, to allow for additional factors including model risk, liquidity risk and counterparty risk.

The carrying value of other receivables and payables are assumed to approximate their fair values.

The Funds classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements.

The fair value hierarchy has the following levels:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (Level 3).

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety.

If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgement by the Directors of the Manager. The Funds consider observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The level assigned to the securities valuations may not be an indication of the risk or liquidity associated with investing in those securities. Because of the inherent uncertainties of valuation, the values reflected in the financial statements may materially differ from the value received upon actual sale of those investments.

The following tables provide an analysis of financial instruments as at 31 January 2017 and 31 January 2016 that are measured in accordance with FRS 102 and have early adopted FRED 62 Amendments to FRS102 - Fair value Hierarchy Disclosures.

Derivatives	-	22,592	-	22,592
Total Liabilities	-	22,592	-	22,592

There were no movements in level 3 instruments for the year ended 31 January 2017 and for the year ended 31 January 2016.

Investments whose values are based on quoted market prices in active markets, and therefore classified within level 1, include active listed equities and exchange traded derivatives. The Funds do not adjust the quoted price for these instruments.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. These include over-the-counter derivatives. As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

The Funds also consider original transaction price, recent transactions in the same or similar instruments and completed third-party transactions in comparable instruments. The Funds also consider other liquidity, credit and market risk factors. The Manager may, with the consent of the Depositary, adjust the model as deemed necessary.

Credit Risk

The Funds minimise concentrations of credit risk by undertaking transactions with a large number of customers and counterparties on recognised and reputable exchanges. The Funds takes exposure to credit risk, which is the risk that a counterparty will be unable to pay amounts in full when due.

All transactions in listed securities are settled/paid for upon delivery using approved brokers. The risk of default is considered minimal, as delivery of securities sold is only made once the broker has received payments. Payment is made on a purchase once the securities have been received by the broker. The trade will fail if either party fails to meet its obligations. See Note 6 for credit ratings of cash broker counterparties.

The Investment Adviser continuously monitors the Funds' credit position.

Depositary Risk

The Funds' Depositary is BNY Mellon Trust Company (Ireland) Limited, (the "Bank"). Substantially all the cash and equities of the Funds are held by BNY Mellon Trust Company (Ireland) Limited at the year end. The Funds are exposed to credit risk through the use of the Bank for their cash and equities. Bankruptcy or insolvency of the Bank may cause the Funds' rights with respect to its cash and equities held by the Bank to be delayed or limited. The maximum exposure to the risk at 31 January 2017 and 31 January 2016 is the amount of cash disclosed in Note 6 and the investments in collective investment schemes, securities, liquidity instruments and forwards disclosed in relevant Funds' Portfolio of Investments.

To mitigate the risks the Funds are exposed to from the use of sub-custodians, the Investment Adviser employs appropriate procedures to ensure that the counterparties are reputable institutions and that the credit risk is acceptable to the Funds. The Funds only transact with sub-custodians that are regulated entities subject to prudential supervision, or with high credit-ratings assigned by international credit-rating agencies. In addition, the Funds' non-cash assets are maintained by the custodian in segregated accounts. Thus in the event of insolvency or bankruptcy of the Custodian the Funds' non-cash assets are segregated and protected and this further reduces counterparty risk. Cash held by the sub-custodians are not protected from insolvency or bankruptcy and this further increases counterparty risk.

Notes to the Financial Statements (Continued)

For the year ended 31 January 2017

5. Taxation

Under current law and practice the Funds qualify as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income or gains.

However, Irish tax may arise on the happening of a "chargeable event". A chargeable event includes any distribution payments to shareholders, any encashment, redemption, cancellation or transfer of Shares and the holding of Shares at the end of each eighth year beginning with the acquisition of such Shares. A chargeable event did not occur for the years end 31 January 2017 and 31 January 2016.

- 1) A Shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Fund or Fund has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and
- 2) Certain exempted Irish tax resident shareholders who have provided the Fund with the necessary signed statutory declarations.

Dividends, interest and capital gains (if any) received on investments made by the Funds may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Funds or its shareholders.

The Finance Act 2010 provides that the Revenue Commissioners may grant approval for investment funds marketed outside of Ireland to make payments to non-resident investors without deduction of Irish tax where no relevant declaration is in place, subject to meeting the "equivalent measures". A fund wishing to receive approval must apply in writing to the Revenue Commissioners, confirming compliance with the relevant conditions.

6. Cash and Cash Equivalents

7. Umbrella Cash Collection Accounts

As notified to Shareholders on 29 June 2016, in response to the CBI publishing the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) Investor Money Regulations 2015 for Fund Service Providers (the "Investor Money Regulations" or "IMR") in March 2015 (effective from 1 July 2016), the Manager undertook, together with BNY Mellon Fund Services Designated Activity Company a review of the way in which subscription, distribution and redemption monies are channelled to and from the Series. As a result of this review, subscription and redemption monies will (effective from 13 June 2016), be channelled through an umbrella cash collection account in the name of the Series and, in respect of any sub-funds considered to be highly leveraged, sub-fund cash collection accounts in the name of the relevant sub-fund(s). Pending issue of the Shares and / or payment of subscription proceeds to an account in the name of the Series or the relevant Funds, and pending payment of redemption proceeds or distributions, the relevant investor will be an unsecured creditor of the relevant Fund in respect of amounts paid by or due to it. For the avoidance of doubt the Funds of the Series are not considered highly leveraged.

11. Efficient Portfolio Management

Forward foreign currency exchange contracts

Forward foreign currency exchange contracts may be used to hedge against anticipated future changes in exchange rates which otherwise might either adversely affect the value of the Funds' portfolio securities or adversely affect the price of securities which the Fund intends to purchase at a later date.

The Funds may also engage in forward currency transactions and utilise futures and options for efficient portfolio management or hedging purposes under the conditions and within the limits laid down by the Central Bank and, if more restrictive, the Securities and Futures Commission (SFC).

Details of Forward Foreign currency exchange contracts are reflected within the Portfolio Statements on pages 9, 26, 31 and 38.

12. Transaction Costs

Transaction costs incurred by the Funds relating to purchase or sale of transferable securities, derivatives or other eligible assets are mainly composed of sub-custodian fees and broker commissions. Transaction costs are included in the transaction price used to calculate the realised and unrealised gain/(loss) on securities.

Custody transaction costs are disclosed in note 9. For the year ended 31 January 2017, custody transaction costs associated with Invesco Asian Equity Fund were \$6,807 (31 January 2016: \$9,158), Invesco Continental European Equity Fund were €5,393 (31 January 2016: €3,998), Invesco Global Select Equity Fund were \$8,023 (31 January 2016: \$9,262), Invesco Japanese Equity Core Fund were ¥1,662,333 (31 January 2016: ¥951,707), Invesco UK Equity Fund were £1,334 (31 January 2016: £1,744) and Invesco Global Real Estate Securities Fund were \$43,550 (31 January 2016: \$41,020).

Notes to the Financial Statements (Continued)

For the year ended 31 January 2017

12. Transaction Costs (continued)

For the year ended 31 January 2017 and 31 January 2016, other transaction costs and commissions amount to:

Funds	CCY	Other	Other
		Transaction Fees 31 January 2017	Transaction Fees 31 January 2016
Invesco Asian Equity Fund	USD	1,088,121	1,014,842
Invesco Continental European Equity Fund	EUR	100,907	182,580
Invesco Global Select Equity Fund	USD	20,530	25,385
Invesco Japanese Equity Core Fund	JPY	132,475,312	161,688,488
Invesco UK Equity Fund	GBP	223,513	292,994
Invesco Global Real Estate Securities Fund	USD	127,516	232,390

13. Significant Events During the Year

In accordance with the requirements of UCITS V: BNY Mellon Trust Company (Ireland) Limited was the Trustee for the Funds until 17 March 2016 and from 18 March 2016 assumed the role of Depositary for the Funds.

On 30 March 2016, the Invesco Asian Equity Fund received a special distribution of US\$425,790. The special distribution related to two Participatory Note investments held by the Fund during the period 2005 to 2008. The Participatory Note issuers informed the Manager of the Fund that a special distribution they received on the underlying investments was to be passed on to the holders of the Participatory Notes for the period it relates to. The special distribution related to the reversal of Chinese tax accruals on the underlying securities of the Participatory Notes.

The Manager of the Fund has decided to treat the receivable as a windfall to the Fund. The accrual represented a 0.03% positive adjustment to the NAV of the Invesco Asian Equity Fund on 30 March 2016.

Effective 12 May 2016, the Manager converted to a Designated Activity Company pursuant to the Companies Act 2014 and updated its name from Invesco Global Asset Management Limited to Invesco Global Asset Management DAC (Designated Activity Company).

The following new share classes were launched during the financial year:

Invesco Global Real Estate Securities Fund: A-Acc USD' share class on 24 February 2016.

Invesco Global Real Estate Securities Fund: C-Acc RMB' share class on 17 November 2016.

Effective 29 July 2016, due to a change in the Distribution Policy of the Funds, for annual distributions made on the last Business Day of January, payments will now be made on 11 February.

A new Consolidated Prospectus for Invesco Fund Series 1, 2, 3, 4, 5, 6 and the Invesco Fund Series was issued on 29 July 2016.

The following share classes were liquidated on 23 August 2016:

Invesco Continental European Equity Fund I-Acc EUR' share class,

Invesco Japanese Equity Core Fund 'A-AD EUR Hgd' share class,

Invesco Japanese Equity Core Fund 'A-Acc CHF Hgd' share class,

Invesco UK Equity Fund I-Acc EUR' share class,

Invesco Global Real Estate Fund 'A-AD EUR Hgd' share class,

Invesco Global Real Estate Fund 'Z-AD GBP' share class,

A share consolidation took place between the 9th and 12th of September 2016 on the Invesco Japanese Equity Core Fund. All shareholders in the Fund were given 1 new Share in exchange for every 10 they held.

14. Subsequent Events

Invesco Asian Equity Fund 'S-Acc' Shares was launched on 23 February 2017.

Invesco Asian Equity Fund 'I-Acc' Shares was liquidated on 23 February 2017.

An updated Consolidated Prospectus was issued on 15 February 2017.

Effective 10 May 2017 the Actual Annual Administration Fee for the following share classes was reduced by 10 basis points:

Invesco Asian Equity Fund Z-Acc EUR share class

Invesco Asian Equity Fund Z-AD USD share class

Invesco Global Select Equity Fund Z-AD USD share class

Invesco Japanese Equity Core Fund Z-Acc EUR share class

Invesco Japanese Equity Core Fund Z-AD USD share class

Invesco UK Equity Fund Z-AD GBP share class

There were no other subsequent events since the year ended 31 January 2017, that could have an effect on these Financial Statements.

15. Approval of Financial Statements

The financial statements were approved by the Directors of the Manager on 23 May 2017.

Statements of the Manager's and Depositary's Responsibilities

The Manager is required under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2015 (the "UCITS Regulations") (as amended), to prepare Financial Statements for each financial period reporting the financial position of each Fund in the Invesco Funds Series (the "Series") as at the end of the accounting period and of its income/excess of expenditure over income for the period. In preparing those Financial Statements, the Manager:

- ensures that the Financial Statements comply with the Trust Deed and FRS 102 applicable accounting standards subject to any material departures which are disclosed and explained in the Financial Statements;
- selects suitable accounting policies and then applies them consistently;
- makes judgements and estimates that are reasonable and prudent;
- prepares the Financial Statements on the going concern basis unless it is inappropriate to presume that the Series will continue in operation; and
- is responsible for taking reasonable steps for the prevention and detection of fraud, error, or non-compliance with laws or the UCITS Regulations, and other irregularities.

The Manager is required to keep proper accounting records and to manage the Series in accordance with the UCITS Regulations, the Hong Kong Code on Unit Trusts, Mutual Funds and the Trust Deed.

The Directors of the Manager of the Series are responsible for the maintenance and integrity of the information related to the Series on the Invesco website. Information on the internet is accessible in many countries with different legal requirements. Legislation in Ireland governing the preparation and dissemination of Financial Statements may differ from legislation in other jurisdictions.

The Directors of the Manager are satisfied that there are arrangements (evidenced by written procedures) in place, to ensure that the obligations set out in Notice 41 are applied to all transactions with connected parties. All transactions with connected parties are at arms length.

The Directors of the Manager are satisfied that transactions with connected parties entered into during the year complied with the obligations set out in Notice 41. A connected party is defined as the promoter, manager, depositary, investment adviser and/or associated or group companies of these.

The Depositary is required under the UCITS Regulations to:-

1. ensure that the sale, issue, repurchase, redemption and cancellation of Shares effected by or on behalf of the Funds are carried out in accordance with the UCITS Regulations and in accordance with the Trust Deed.
2. ensure that the value of shares is calculated in accordance with the UCITS Regulations and the Trust Deed.
3. carry out the instructions of the Manager unless they conflict with the UCITS Regulations or the Trust Deed.
4. ensure that where transactions involve the Funds' assets, any consideration is remitted to the Fund within time limits which are acceptable market practice in the context of such a transaction.
5. ensure that the Funds' income is applied in accordance with the UCITS Regulations and the Trust Deed.
6. enquire into the conduct of the Manager in each annual accounting period and report thereon to the Shareholders. The Depositary 's report shall be delivered to the Manager in good time to enable the Manager to include a copy of the report in its Annual Report. The Depositary 's Report shall state whether in the Depositary 's opinion the Funds have been managed in that period:
 - (i) in accordance with the limitations imposed on the investment and borrowing powers of the Manager and Depositary by the Trust Deed and the UCITS Regulations; and
 - (ii) otherwise in accordance with the provisions of the Trust Deed and the UCITS Regulations.

If the Manager does not comply with (i) or (ii) above, the Depositary must state why this is the case and outline the steps which the Depositary has taken to rectify the situation.

The Depositary must notify the Central Bank of Ireland promptly of any material breach of the UCITS Regulations, conditions imposed by the Central Bank of Ireland or provisions of the prospectus with regard to the Fund.

The duties provided for above may not be delegated by the Depositary to a third party. These duties must be carried out in the State.

The Depositary also takes into its custody or under its control all the assets of the Funds and holds them in safekeeping for the Shareholders. The Depositary will provide record keeping and ownership verification services in respect of assets of the Trust not held in custody in accordance with the provisions of the UCITS Directive and the UCITS Regulations. The Depositary will also provide cash monitoring services in respect of each Fund's cash flows and subscriptions.

Report of the Independent Auditors to the Shareholders of Invesco Funds Series (the "Series")

Report on the financial statements

Our opinion

In our opinion, Invesco Funds Series' financial statements (the "financial statements"):

- give a true and fair view of the Funds' assets, liabilities and financial position as at 31 January 2017 and of their results for the year then ended;
- have been properly prepared in accordance with Generally Accepted Accounting Practice in Ireland; and
- have been properly prepared in accordance with the requirements of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended).

What we have audited

The financial statements, included within the Annual Report, comprise:

- the Statement of Financial Position as at 31 January 2017;
- the Income Statement for the year then ended;
- the Statement of Changes in Net Assets attributable to Holders of Redeemable Participating Shares for the year then ended;
- the Portfolio Statement for each of the Funds as at 31 January 2017; and
- the notes to the financial statements for each of its Funds which include a summary of significant accounting policies and other explanatory information.

The financial reporting framework that has been applied in the preparation of the financial statements is Irish law and accounting standards issued by the Financial Reporting Council and promulgated by the Institute of Chartered Accountants in Ireland (Generally Accepted Accounting Practice in Ireland), including FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland".

In applying the financial reporting framework, the manager has made a number of subjective judgements, for example in respect of significant accounting estimates. In making such estimates, the manager has made assumptions and considered future events.

Responsibilities for the financial statements and the audit

Our responsibilities and those of the manager

As explained more fully in the Statements of the Manager's and Depositary's Responsibilities set out on page 69 the manager is responsible for the preparation of the financial statements giving a true and fair view.

Our responsibility is to audit and express an opinion on the financial statements in accordance with Irish law and International Standards on Auditing (UK and Ireland). Those standards require us to comply with the Auditing Practices Board's Ethical Standards for Auditors.

This report, including the opinion, has been prepared for and only for the shareholders of each of the Funds as a body and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

What an audit of financial statements involves

We conducted our audit in accordance with International Standards on Auditing (UK and Ireland). An audit involves obtaining evidence about the amounts and disclosures in the financial statements sufficient to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or error. This includes an assessment of:

- whether the accounting policies are appropriate to the Funds' circumstances and have been consistently applied and adequately disclosed;
- the reasonableness of significant accounting estimates made by the manager; and
- the overall presentation of the financial statements.

We primarily focus our work in these areas by assessing the manager's judgements against available evidence, forming our own judgements, and evaluating the disclosures in the financial statements.

We test and examine information, using sampling and other auditing techniques, to the extent we consider necessary to provide a reasonable basis for us to draw conclusions. We obtain audit evidence through testing the effectiveness of controls, substantive procedures or a combination of both.

In addition, we read all the financial and non-financial information in the Annual Report to identify material inconsistencies with the audited financial statements and to identify any information that is apparently materially incorrect based on, or materially inconsistent with, the knowledge acquired by us in the course of performing the audit. If we become aware of any apparent material misstatements or inconsistencies we consider the implications for our report.

- (a) The maintenance and integrity of the www.invesco.com website is the responsibility of the manager; the work carried out by the auditors does not involve consideration of these matters and, accordingly, the auditors accept no responsibility for any changes that may have occurred to the financial statements since they were initially presented on the website.
- (b) Legislation in the Republic of Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Report from the Depositary to the Unitholders

For the period from 1st February 2016 to 31st January 2017 (the "Period")

BNY Mellon Trust Company (Ireland) Limited (the "Depositary", "us", "we" or "our") has enquired into the conduct of the management company (the "Manager") in respect of the Invesco Funds Series (the "Trust") for the Period, in our capacity as Depositary to the Trust.

This report including the opinion has been prepared for and solely for the Unitholders in the Trust, in accordance with Regulation 34 of the European Communities (Undertakings for Collective Investments in Transferable Securities) Regulations 2011 (S.I. no 352 of 2011), as amended (the "Regulations") and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in Regulation 34 of the Regulations. One of those duties is to enquire into the conduct of the Manager in each annual accounting period and report thereon to the Unitholders.

Our report shall state whether, in our opinion, the management has managed the Trust in that period in accordance with the provisions of the Trust's trust deed and the Regulations. It is the overall responsibility of the Manager to comply with these provisions. If the management of the Trust has not done so, we as Depositary must state in what respect it has not done so and the steps which we have taken in respect thereof.

Basis of Depositary Opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Regulation 34 of the Regulations and to ensure that, in all material respects, the management has managed the Trust (i) in accordance with the limitations imposed on its investment and borrowing powers of the Manager and Depositary by the trust deed and the appropriate regulations and (ii) otherwise in accordance with the provisions of the trust deed and the appropriate regulations.

Opinion

In our opinion, the management has managed the Trust during the Period, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Manager and Depositary by the trust deed and the Regulations; and
- (ii) otherwise in accordance with the provisions of the trust deed and the Regulations.

Ireland

Additional Information (Unaudited)

1. Remuneration Policy

Following recent changes to the rules applicable to UCITS management companies (such as the Manager, Invesco Global Asset Management DAC), the Manager adopted on 18 March 2016 a revised remuneration policy which is consistent with the new remuneration principles applicable to UCITS management companies. Its purpose is to ensure that the remuneration of the staff of the Manager is consistent with and promote sound and effective risk management, does not encourage risk-taking which is inconsistent with the risk profiles, rules or instruments of incorporation of itself and the UCITS it manages (including the Company) and does not impair the Manager's compliance with its duty to act in the best interests of the UCITS it manages. Further information is available in the Manager's UCITS Remuneration Policy document which can be obtained from the website of the Manager (www.invescomanagementcompany.ie). A copy may be obtained, free of charge, at the registered office of the Manager.

The rules require the Manager to disclose in the Company's annual report, certain quantitative disclosures concerning the Manager's remuneration policy, including:

(i) the total and aggregate amount of remuneration paid by the Manager to its staff (including any amounts paid directly by the Company); (ii) the number of beneficiaries; (iii) a description of how the remuneration and benefits have been calculated; and (iv) certain information regarding the Manager's oversight of its remuneration policy and details of any changes to the Manager's remuneration policies since the previous annual report. However, as noted above, the revised policy has been in place for less than a full performance period. Consequently, in accordance with the relevant rules, the aforementioned disclosures are not included in this report as the available partial-year information would not provide materially relevant, reliable, comparable and clear information to investors. The Manager will disclose the quantitative UCITS remuneration data in the next annual report for the Company where information for a full performance year will be available.

2. Securities Financing Transactions Regulation:

As at 31 January 2017, the aggregate value of securities on loan from the Funds and the value of collateral held by the Funds in respect of these securities is Nil.

3. PEA Disclosure (Plan d'Épargne en Actions)

From the 1 February 2016 to 31 January 2017, the following sub-funds held the average percentage, as specified in the table, of their assets invested at any time in PEA eligible securities as defined by the Article L.221-31 of the Code Monétaire et Financier. This is required by sub-funds registered in France that meet the Equity Savings Plan (PEA) requirements.

	Invesco UK Equity Fund	Invesco Continental European Equity Fund
Average %	97.78	82.87
